Miss Pamela Gilbert, our entomological librarian, kindly allowed me to consult and to quote from the MS of her "Compendium of the biographical literature on deceased entomologists" which is to be published by the BMNH later this year.

MAILING LIST - Additions:

Mr L. S. Cuy - Department of Entomology, College of Agriculture, University of the Philippines at Los Baños, College, Laguna 3720, PHILIPPINES

Dr M. Portús, Cátedra de Parasitología Animal, Facultad de Farmacia, Universidad de Barcelona, Barcelona, SPAIN

T H E S E S - Dr K. C. Emerson, of Arlington, Virginia, U.S.A., kindly wrote to me: "I am glad that you chose to discuss theses in Flea News No. 9. I support your views completely. Over the years the position that many universities have taken that a thesis is a publication has created problems as you mentioned. As a rule universities in the United States do not consider a thesis as a publication unless it is published and distributed by recognized and traditional media: journal, special publication, etc., for scientific papers."

In the note on theses in FN 9 I expressed the hope that "proper illustrated descriptions [of Beaucournu's preliminarily diagnosed new taxa] will be published soon in a formal medium." - The moment I had mailed FN 9 (on 20.X.1976) I went to our entomological library and found that the journal, in which the descriptions of two of the three n. sspp. - by Beaucournu & Grulich- had just arrived. An instant answer to my prayer !

Dr W. L. Jellison would like it to be known that the main collection of fleas at the Rocky Mountain Laboratory, Hamilton, Montana, was transferred to the U. S. National Museum about twelve years ago. This collection consists of about 12.000 determined specimens on slides.

"To sit down at a microscope on long winter evenings is to get lost in a world of dreams, of wonderful colours and shapes. It is like discovering a new universe every day."

M. Rothschild, 1977

"We spend a great deal of time correcting mistakes made by others
--- as well as a few of our own."

K. Jordan

ER - Entomologist's Rec. J. Var.

IN - Irish Nat.

1895 (3.VII) - Casual notes on fleas. NZ 2(2): 66.

1897b (1.VII) - A new British flea (*Tryphlopsylla dasyncnemus*, sp. nov.).
ER 9(7): 159, pl. IV figs. a, b.

1898b (31.XII) - Contributions to the knowledge of the Siphonaptera.
NZ 5(4): 533-544, fig. 1, pl. XVa figs. 1-5, pl. XVI figs. 6-11,
pl. XVII figs. 12-25.

1900a (15.I) - A new British flea. ER 12(1): 19-20.

1900c (15.X) - The giant flea: *Hystrihopsylla talpae*. ER 12(10): 257-258,
pl. X figs. A-F.

1901a (15.IV) - Notes on *Pulex canis* Curtis, and *Pulex felis* Bouché.
ER 13(4): 126, pl. III figs. A-C.

1901c (15.XII) - A new British flea. ER 13(12): 362.

1902b (X) - New British fleas. MM 38(461): 225, pl. IV figs. 1-7.

1903b (IV) - New species of Siphonaptera from Egypt and the Soudan.
MM 39(467): 83-87, pl. I figs. 1-9, pl. II figs. 10-19.

1903d (20.VII) - A new British flea: *Typhloceras poppei*, Wagner.
 ER 15(8): 196-197, pl. IX figs. 1-4.

1903f (15.XII) - *Ceratophyllus fringillae*, Walker. ER 15(12): 308-309,
pl. 12 figs. 1-3.

- 1903g (20.XII) - Further contributions to the knowledge of the Siphonaptera.
NZ 10(3): 317-325, pl. IX figs. 1-13, pl. X figs. 14-27.
- 1903h (20.XII) - Note on *Pulex pallidus* Taach. NZ 10(3): 542.
- 1903i (XII) - A new British flea, *Ceratophyllus dalei*, sp. nov.
EN 36(487): 297-298, pl. V figs. 1-3.
- 1904a (I) - New species of Siphonaptera from Egypt. EN 37(488): 1-4,
pl. I figs. 1-5, pl. II figs. 6-8.
- 1904b (30.VI) - Description of a new species of Siphonaptera from S. America.
RC 8(3): 147-148.
- 1904c (12.IX) - Further contributions to the knowledge of the Siphonaptera.
NZ 11(2): 602-653, pl. VII figs. 1-10, pl. VIII figs. 11-21, pl. IX
figs. 22-30, pl. X figs. 31-41, pl. XI figs. 42-51, pl. XII figs. 52-58,
pl. XIII figs. 59-69, pl. XIV figs. 70-79, pl. XV figs. 80-88, pl. XVI
figs. 89-95.
- 1905a (11.II) - On North American *Ceratophyllus*, a genus of Siphonaptera.
NZ 12(1): 153-174, pl. VI figs. 1-12, pl. VII figs. 13-20, pl. VIII
figs. 21-26, pl. IX figs. 27-34.
- 1905b (11.II) - Some further notes on *Pulex canis* Curtis and *Pulex felis*
Bouché. NZ 12(1): 192-193, figs. A, B.
- 1905c (III) - Notes on *Stephanocircus dasyuri*, Skuse, and *Stephanocircus*
simsoni, sp. nov. MM 41(490): 60-62, pl. I figs. 1-4.
- 1905d (VI) - Occurrence of *Pulex cheopis*, Rothsch., at Plymouth.
MM 41(493): 139.
- 1905e (20.IX) - Some new Siphonaptera. NZ 12(2): 479-491, pl. XIII
figs. 1-7, pl. XIV figs. 8-16.
- 1905f (XI) - A new British flea: *Ceratophyllus farreni*, spec. nov.
MM 41(498): 255-256, pl. VIII figs. A, B.
- 1906a (24.II) - Notes on bat fleas. NZ 13(1): 186-188, figs. 1-2.
- 1906b (III) - A new British flea: *Ceratophyllus insularis*, spec. nov.
MM 42(502): 59-60, pl. II figs. A, B.
- 1906c (IV) - A new Egyptian flea. EN 39(515): 75, pl. IV figs. 1-3.
- 1906d (27.IX) - Note on the species of fleas found upon rats, *Mus rattus*
and *Mus decumanus*, in different parts of the world, and on some
variations in the proportion of each species in different localities.
JH 6(4): 483-485.
- 1906e (4.X) - Three new Canadian fleas. CE 38(10): 321-325, figs. 41-44.

The following were privately printed to send to correspondents:

- Instructions. Wanted Fleas ! [prior to 1907] (1 p.)
- Chigoes. (1 p.)
- Instructions. [for obtaining bird-fleas] (1 p.)
- British Siphonaptera. Pulicidae. 1913. [a check-list] (1 p.)
- List of records of and articles on Siphonaptera by N. Charles Rothschild. 1917. (26 pp.)

N O T E S

- R. 1904b - This is a copy of the description of *Ceratopsylla wolffsohni* from 1903h (without figures).
- R. 1907d - This is a translation of the privately published sheet with "Instructions".
- R. 1908a - For more precise locality data concerning the species described, see R. B. Woosman, 1909, Trans. zool. Soc. Lond. 19(1): 5-23.
- R. 1908b - This is an edition of only 250 copies (see Sjöstedt, 1: 77).
A description of one of the new fleas, *Moeopsylla sjoestedti* n. gen., n. sp., had already been published by Jordan & Rothschild, 1908 (31.III). In the latter paper this species is not described (but listed, with particulars of the Rothschild 1908b type specimens); however, there is a description of the monotypic genus and the generic description therefore also serves as that of the species.
- R. 1909b - This is a copy of the description of *Ctenopsyllus allophylus* n. sp. from 1908c.
- R. 1909d - This is a copy of the description of *Stephanocircus wolffsohni* from 1909a (without figures).
- R. 1910g - The new taxa (*Ctenoparia inopinata* gen. nov., spec. nov. and *Parapsyllus coxalis* spec. nov.) had already been published in 1909e.
- R. 1916b - Although printed on 21.II.1916, this paper was issued on 12.VII.1916.

- 1920d (20.I) - A new *Ctenophthalmus* from Macedonia. EC 1(2): 123-125, figs. 102-103.
- 1921a (15.I) - A new species of *Sarcopsyllidae*. EC 1(3): 131-132, figs. 105-106.
- 1921b (15.I) - Four new Palaearctic *Ctenophthalmus*. EC 1(3): 133-137, figs. 107-112.
- 1921c (15.I) - Two new Palaearctic *Siphonaptera*. EC 1(3): 138-140, figs. 113-115.
- 1921d (15.I) - New genera and species of bat-fleas. EC 1(3): 142-162, figs. 116-147.
- 1921e (15.I) - Eight new *Ceratophylli*. EC 1(3): 163-177, figs. 148-164.
- 1921f (15.I) - On *Ceratophyllus fasciatus* and some allied Indian species of fleas. EC 1(3): 178-198, figs. 165-194.
- 1922a (1.IX) - New species of *Siphonaptera* collected by Mr. C. Boden Kloss in the Malay peninsula and south Annam. EC 1(4): 217-222, figs. 209-215.
- 1922b (1.IX) - The *Siphonaptera* collected by Mr. E. Jacobson on Sumatra. EC 1(4): 223-230, figs. 216-224.
- 1922c (1.IX) - On *Pygiopsylla* and the allied genera of *Siphonaptera*. EC 1(4): 231-265, figs. 225-257.
- 1922d (1.IX) - New *Siphonaptera*. EC 1(4): 266-283, figs. 258-275.
- 1923a (20.XI) - Additions to the catalogue of Swiss *Siphonaptera*. EC 1(5): 287-289, fig. 281.
- 1923b (20.XI) - Further records of Algerian *Siphonaptera*. EC 1(5): 290-292.
- 1923c (20.XI) - On some *Siphonaptera* from the eastern hemisphere. EC 1(5): 293-308, figs. 282-311.
- 1923d (20.XI) - New American *Siphonaptera*. EC 1(5): 309-319, figs. 312-327.
- 1923e (20.XI) - On the genera *Rhopalopsyllus* and *Parapsyllus*. EC 1(5): 320-370, figs. 328-383.
- 1926 (XII) - *Siphonaptera* from Borneo. SM3(3)(10): 287-292, figs. 1-7.

* * *

N O T E S

- J. & R. 1923 - *Ectoparasites* 1(5) was published on 20.XI.1923, not on 10.XI.1923 as stated on the cover.
- J. & R. 1926 - This paper, with descriptions of three new species, was published in XII.1926, actual date not known; in these circumstances the rule is to regard the date of publication as the last possible, i.e., 31.XII.1926. Jordan described the same three new species in NZ 33(3): 385-394, which is stated to have been published on 8.XII.1926 and therefore has priority.

Ectoparasites 1(1-6) [1915-1924] - This is a scarce publication as only 250 copies were printed. The volume has long been out of print; the last complete sets were sold thirty years ago.

INTERNATIONAL CONFERENCE ON FLEAS

ASHTON WOLD, PETERBOROUGH, ENGLAND, U.K.

21st - 25th June 1977

Congress Sponsored by: LONDON SCHOOL OF HYGIENE AND TROPICAL MEDICINE : ROYAL ENTOMOLOGICAL SOCIETY OF LONDON

Chairman of Medical Section : DR. N. G. GRATZ (W. H. O.)

Organising Committee :

Mrs. G. Brinck-Lindroth

Dr. T. Clay

Dr. M. Rothschild

Mr. F.G.A.M. Smit

Prof. R. Traub

All Correspondence to :

THE ORGANISING SECRETARY,
ASHTON WOLD,
ASHTON, PETERBOROUGH, PE 8 SLZ
ENGLAND, U.K.

Telephone : Oundle (08322) 3575

January 1977

Dear Colleague,

The organisers have been particularly delighted with the number of papers promised. A provisional programme has been made and it is proposed to have papers read from 8.30 a.m. to 12.30 p.m. on Wednesday, Thursday, Friday and Saturday. Afternoons and evenings will be left free - apart from the excursions - for the delegates to organise informal discussions and meetings between themselves if they wish to do so.

Papers have been provisionally divided into four categories:

- Medical and Veterinary
- Physiology and Morphology
- Evolution and Zoogeography
- Taxonomy and Ecology

Lectures will be limited to about 15 minutes each, with extra time for discussion.

The International Journal for Parasitology has agreed to publish a synopsis of the proceedings of the Flea Conference. As indicated in Flea News (8), the Organising Committee will prepare this synopsis based on the new information abstracted by the authors from their own papers. The synopsis will not take up more than two or three pages of printed text. In addition, the International Journal for Parasitology is willing to consider papers for publication but they will have to be refereed in the usual manner. If they are handed in to the secretariat at the Conference, suitably prepared for the Int. J. Parasit., they will be sent en bloc to the editors and there will then be a possibility of them all being published in the same number of the journal (if accepted by the referees).

- @ Contributors are reminded that we wish to have type-written abstracts
- @ of the papers to be delivered by the beginning of June, if possible,
- @ so that they can be duplicated and circulated before the Conference.

On Thursday, 23rd June, there will be a cocktail party on the village green from about 6.30 p.m. onwards and delegates are cordially invited to ask any friend in the U.K. - not necessarily participating in the Conference - to attend this party.

Apart from the excursions, the cocktail party on Thursday, June 23rd, and the party on Saturday, June 25th, a tennis court, squash racquets court and swimming pool will be available for delegates and their families throughout the meeting.

The Organising Committee
