In 1949 the entire collection of flea-literature present in the Flea Room
of Tring Museum fitted a one-metre shelf. There was no index to any lite-
rature; Dr Jordan had most of the important titles in his head.

Now the Flea Room [London] has about 20 metres shelf-length of literature
(7 metres of books, 13 metres of reprints in 200 boxes). During the past
thirty years we have endeavoured to compile as complete an index to the
flea literature as was possible and a card-index now totals nearly 11.000
titles. It will be realized that completeness is a rather evasive target
which is seldom reached - we certainly have not reached it (and now never
will do so). - Apart from a general index, there is also an annual one
(as a handlist up to 1950, from 1949 onwards as a card-index).

How the literature output has grown over the years can be seen from the
numbers of publications per annum, based on our card-index, given below:
