THE GHOST OF TRING MUSEUM

In my imagination I can still hear them . . . the heavy footsteps, a dozen or so . . . the occasional strange, sometimes eerie noises, always totally unaccounted for. Indeed, ghostly sounds they were; never was there any evidence of a person or other object that could have caused them.

Way back in 1949, on January 2nd to be precise, I arrived in Tring from my native country, The Netherlands, carrying a microscope, a violin and a suitcase. I had been offered a job as temporary assistant in the Flea Room and, being mad-keen on fleas, grasped the chance of a lifetime with alacrity. A boarding-house opposite the museum provided frugal but adequate lodging. Uninhibited as my interest in these insects was, I greatly and gratefully enjoyed the wonderful Rothschildian atmosphere which in those days still pervaded Tring Museum. One could work with unfettered enthusiasm for as many hours a day as one wanted. Tring town being as dead as a dodo (and even nicknamed 'Dodo Town' in those days) and true homely comforts out of reach, I used to work - well, be in the museum, if you like - till 11 or 12 o'clock at night, including Saturdays and Sundays [in these early years I could not quite understand why it was thought unusual for me to go to the museum for some hours on Christmas Day]. For the first year or so my place of work in the museum was at one end of one of the two large Lepidoptera Halls (demolished in 1970; they used to house some 2½ million specimens), near the entrance to the two Flea Rooms (likewise demolished), one of which was still occupied by Freddie Cox (who retired, after 50 years of assistance-ship in the Flea Room, in 1951), the other room by Dr Karl Jordan who was then 88 years old and still going strong (he only was stone-deaf). Quite often Dr Jordan used to come in, after a day's work, between 8 and 9 in the evening, also staying till about midnight (and then after arriving home - a 15 minutes' walk away - he would often make himself comfortable in his easy chair, pick up the detective story he was reading and finally go to bed between one and two o'clock in the morning - to rise again at 8 a.m.).

One evening, sitting as usual in the large dark hall with only a lamp shining over my table, I heard footsteps not far behind me. Being flea-drunk, I took no notice. Not long after, another evening at about the same time - around 9 o'clock - I once again heard heavy footsteps but somehow thought that Dr Jordan had come in. A little later I noticed that no lights had been switched on in his room and indeed Dr Jordan had not arrived. Once again I did not dwell upon the sounds. However, when a few days later the loud footsteps, about a dozen of them, were one evening again heard behind me, I listened more attentively but I failed to associate the sounds with any person; I switched lights on, made a tour of inspection but saw nobody. The caretaker used to do his round at about 11 p.m. and one could hear him coming from afar, pass and go off again. The sounds of the building itself were soon familiar; the wooden floors and the numerous cabinets did emit

regular cracking sounds. The footsteps phenomenon continued at a rate of once every few weeks and between 9 and 11 p.m. I had grown quite used to them and they did not bother me. When later in my first year I happened to mention the odd sounds to the old librarian she looked startled and said "So you have heard them too? They are Lord Walter Rothschild's footsteps." She then told me that one evening, not long after his lordship's death, she worked till a rather late hour and heard his footsteps in the Bird Room (having worked with him for many years she was very familiar with the footsteps of the heavy man) - she never again worked late hours in Tring Museum. Subsequently I also learned from colleagues at Tring Museum that during the years of the second world war members of the staff who had to be on night-duty for museum-safety reasons (a few incendiary bombs did fall on Tring town but the museum came through unscathed) and for whom a bed was provided in a corner of the large Flea Room, soon became familiar with the inexplicable sound of footsteps and it was apparently common knowledge then that Lord Rothschild regularly revisited his beloved museum.

Occasionally there were other sounds which defied explanation and I well remember one evening at around ten when at the other end of the large hall a tumultuous banging noise broke out which lasted for about half a minute - that I did not like. A little later I switched the lights on in the hall and went down to investigate; no sign of anything that could have been playing up.

After some years, officialdom began to get a firmer grip on the liberal atmosphere of Tring Museum and I was instructed to leave the sanctuary at eight o'clock each day but Saturday and Sunday at five. Too early to hear the ghost and indeed for me it was the end of the footsteps. Once, though, I did have a most disagreeable experience. The route out of the museum was Flea Room, Dr Jordan's room, the room which Lord Rothschild had used for his entomological studies, a lobby, a corridor, the large L-shaped Bird Room and the workshop. It was winter and I never bothered to switch on any lights during my way out as I could find my way blindfolded. Well, that evening the moment I entered Lord Rothschild's room I felt, for no obvious reason, at once terribly cold and extremely scared, my hair actually rising in fear. Nothing unusual was seen or heard, but I still find it difficult to believe that I managed to pass through that room. - A week or so later, at around 20 hrs, I found Dr Jordan being violently sick in that very room. Coincidence, perhaps.

A ghostly apparition was never seen; not in Tring Museum. I did see a ghost once. In February 1952 a friend and I decided to do some trapping just outside Tring. It was a cold dark winter evening. We had placed about two-dozen traps in an extensive piece of jungle-like woodland. At 23.30 hrs we went out there to inspect and bag the catches. When finally we came to the last few traps, which were placed around a small clearing, deep in the jungle, I shone the torch on the traps and informed my friend in elated voice that there was a fine bankvole. He did not react. When I turned to him, expecting him to have the bag open to receive the catch, I saw him standing and staring. When I looked in the same direction: lo and behold, only a few yards away - in the torchlight - was the figure of a headless man in a long dark coat, hands in the coat pockets, silently gliding over the rough ground and gradually disappearing into nothingness. We then looked at one another: did you see that? It certainly was no physical body; who, in any case, would be wandering about at midnight in the cold in woodland so dense and dark that one could not find one's way out without a torch?

Ah, those were the days! The days of good old Rothschildian Tring Museum which flourished on trust and where, for instance, one could - day or night - freely walk into the superb library and enjoy Audubon's elephant-folio volumes, the beautifully bound volumes with Keulemans' originals, the various editions of *Ortus Sanitatis*, Curtis' originals or the numerous old books of travel and adventure. Just how good it was to be there in those days is obvious from what the late Dr Karl Jordan wrote to me on 17.XII.1947: "I spent my birthday [86th] in the Museum, the greatest pleasure I have at my age. I am very fortunate that I have such a great interest which occupies my thoughts and prevents me from dwelling too often and too long on the affairs of mankind."

It will be understood that - although their titles are given in English in these lists - papers in Russian or Chinese periodicals, or books published in the USSR or China, are in Russian or Chinese (but often with summaries in English).

In the literature lists accompanying Flea News 1 - 20,
covering the years 1973 - early 1980,
1605 titles are enumerated,
i.e., an average of 227 titles a year.

The numbers of authors involved per publication in those 1605 titles are:

1 author	-	713 titles	(45%)
2 authors	-	437 "	(27%)
3 "	-	221 "	(14%)
4 "	-	119 "	(7%)
5 "	-	45 "	
6 "	-	27 "	
7 "	-	21 "	
8 "	-	5 "	
9 "	-	3 "	
10 "	-	6 "	(7%)
11 "	-	4 "	
12 "	-	2 "	
13 "	-	1 "	
14 "	-	1 "

Publications on SIPHONAPTERA

by

F. G. A. M. S M I T

- 1946 (X) - Vlooien. *Natura*, Amst. 45(6)[540]: 122-127, figs. 1-4.
- 1947a (1.IX) - Notes on the list of Dutch Aphaniptera. *Ent. Ber.*, Amst. 12(277): 170-172.
- 1947b (1.X) - Chronological review of Dutch authors and their papers on Aphaniptera, with a list of Dutch Aphaniptera. *Tijdschr. Ent.* 88: 375-388.
- 1947c (1.XI) - Siphonaptera Neerlandica. *Faunae novae species I.* *Ent. Ber.*, Amst. 12(278): 200.
- 1948a (III) - De betekenis van vlooiën en luizen voor het mensdom. In *Weer en Wind* 10(10): 190-193.
- 1948b (IV) - Das Sammeln ektoparasitärer Insekten. *Bull. Lig. luxemb. Prot. Oiseaux* (3)28(7): 102-106.
- 1948c (1.VII) - Methoden voor het verzamelen van ectoparasitaire insecten. *Ent. Ber.*, Amst. 12(282): 253-258.
- 1948a (VIII, IX) - Vlooien. *Microwereld* 3(8): 443-448; 3(9): 453-456, figs. 1-3.
- 1949a (1.VII) - Monstrosities in Siphonaptera. *Tijdschr. Ent.* 90: 35-42, figs. 1-2.
- 1949b (1.XI) - Monstrosities in Siphonaptera II. Duplication of the receptaculum seminis in *Xenopsylla cheopis* Roths. *Ent. Ber.*, Amst. 12(293): 436-437, 1 fig.
- 1950a (1.IV) - Siphonaptera Neerlandica. *Faunae novae species II.* *Ent. Ber.*, Amst. 13(298): 63-64, figs. 1-3.
- 1950b (1.IX) - Siphonaptera Neerlandica. *Faunae nova species III.* *Ent. Ber.*, Amst. 13(303): 137-141, figs. 1-4.
- 1950c (29.XII) - A new *Echidnophaga* from Africa (Siphonaptera). *Entomologist* 83(1051): 272-274, figs. 1-5.
- 1951a (10.I) - Vlooien en luizen. [Series: Wat leeft en groeit, No. 27]. *Utrecht (Het Spectrum)*: 1-152, figs. 1-22, pl. I figs. 1-2, pl. II figs. 3-4, pl. III figs. 5-6, pl. IV figs. 7-8, pl. V figs. 9-10, pl. VI figs. 11-12, pl. VII figs. 13-14, pl. VIII figs. 15-16, pl. IX figs. 17-18, pl. X figs. 19-20, pl. XI figs. 21-22, pl. XII figs. 23-24, pl. XIII figs. 25-26, pl. XIV figs. 27-28, pl. XV figs. 29-30, pl. XVI figs. 31-32.
- 1951b (20.III) - On two African polytypic species of *Leptopsylla* (Siphonaptera). *Tijdschr. Ent.* 93: 25-40, figs. 1-34.
- 1951c (IV) - A new flea from Madagascar. *Ann. Mag. nat. Hist.* (12)4(40): 407-409, figs. 1-2.
- 1952a (IV) - The status of *Nearctopsylla* (*Hollandiana*) *jordani* *jordani* Hubbard, 1940 and *Nearctopsylla* (*H.*) *jordani* *traubi* Hubbard, 1949. *Ann. Mag. nat. Hist.* (12)5(52): 340-346, figs. 1-16.
- 1952b (26.VI) - Notes on some names of fleas described by C. W. Dale in 1878. *Entomologist's mon. Mag.* 88(1057): 133-134.
- 1952c (20.VIII) - *Rothschildiana*, a new genus of Siphonaptera (Fam. *Hystrihopsyllidae*, subfam. *Neopsyllinae*, tribe *Neopsyllini*). *Entomologist* 85(1071): 169-170, fig. 1.

- 1952d (IX) - Descriptions of two new fleas, with a redescription of the genus *Chimaeropsylla* Rothschild, 1911. *Ann. Mag. nat. Hist.*(12)5(57): 844-856, figs. 1-19.
- 1952e (X) - A possible explanation of the occurrence of the flea *Frontopsylla* (Orfrontia) *laeta* in Scotland. *Scott. Nat.* 64(2): 74-83, figs. 1-2.
- 1952f (1.XII) - Monstrosities in Siphonaptera III. Castration in a male *Ceratophyllus gallinae* (Schrank). *Ent. Ber., Amst.* 14(330): 182-187, figs. 1-4.
- 1952g (29.XII) - A new flea from western North America. *Proc. ent. Soc. Wash.* 54(6): 269-273, figs. 1-6.
- 1953a (I) - *Ctenophthalmus* (*Euctenophthalmus*) *congener congener* Roths., 1907: a flea new to Great Britain. *Entomologist* 86(1): 19-22, figs. 1-5.
- 1953b (I) - The story of *Pulex imperator* Westwood, 1858. *Bull. Annls Soc. r. ent. Belg.* 89(1-2): 58-60.
- 1953c (II) - Identification of fleas. *Bull. Wld Hlth Org.* 7: 323-333, figs. 1-43.
- 1953d (III) - The presence in Scotland of *Tarsopsylla octodecimdentata* (Kol.), a flea hitherto unrecorded from the British Isles. *Scott. Nat.* 65(1): 5-10, figs. 1-7.
- 1953e (V) - Vlooiën vangen. Een heerlijke natuursport. *Wandelaar* 21(5): 117-119.
- 1953f (VIII) - A second record of the flea *Ctenophthalmus congener congener* Rothschild from the British Isles. *Entomologist* 86(8): 199-200.
- 1953g (10.X) - Some new records of fleas from Ceylon, with the description of a new species of *Nosopsyllus*. *Ceylon J. Sci. (B)* 25(2): 149-153, pl. XXXI fig. 1, pl. XXXII fig. 2, pl. XXXIII figs. 3-13.
- 1953h (21.X) - Notes on the flea *Nosopsyllus londiniensis* (Rothschild) (*Siphon.*, *Ceratophyllidae*) in Great Britain. *Entomologist's mon. Mag.* 89(1073): 255-257.
- 1953i (XI) - Transport of Mallophaga by fleas. *Parasitology, Camb.* 43(3-4): 205-206, fig. 1.
- 1953j (1.XII) - Monstrosities in Siphonaptera IV. More cases of castration. *Ent. Ber., Amst.* 14(342): 393-400, figs. 1-12.
- 1953k (4.XII) - Descriptions of new and little-known Siphonaptera. *Bull. Brit. Mus. nat. Hist., Ent.* 3(5): 187-219, figs. 1-62.
- 1953l (10.XII) - Records of Siphonaptera from Denmark. *Ent. Meddr* 26(7): 529-548.
- 1953m (18.XII) - Results of the Archbold Expeditions. No. 70. Siphonaptera from Netherlands New Guinea. Part 1. *Amer. Mus. Novit.* (1638): 1-53, figs. 1-75.
- 1953n (XII) - The author's name and date of the rat-flea *Nosopsyllus fasciatus*. *J. Soc. Bibliogr. nat. Hist.* 3(1): 34-35.
- 1954a (27.II) - Twee voor de Nederlandse fauna nieuwe vleermuisvlooiën (*Siphonaptera Neerlandica*. *Faunae novae species*, IV). *Natuurh. Maandbl.* 43(2): 11-15, figs. 1-9.
- 1954b (13.III) - Identification of fleas. In: R. Pollitzer - *Plague* (Monogr. Ser. 22, Wld Hlth Org., Geneva): Annex 2: 648-682, figs. 1-40.
- 1954c (13.III) - Détermination des puces. In: R. Pollitzer, *La peste* (Monogr. Ser. 22, Org. Santé mond., Genève): Annexe 2: 685-719, figs. 1-40.
- 1954d (10.V) - New bat-fleas (*Siphonaptera: Ischnopsyllidae*). *Parasitology, Camb.* 44(1-2): 144-156, figs. 1-32.

- 1954e (1.IX) - Siphonaptera van Terschelling en Schiermonnikoog. Ent. Ber., Amst. 15(9): 197-200.
- 1954f (17.XI) - Lopper. Danm. Fauna 60: 1-125, figs. 1-182.
- 1955a (III) - A further note on the name of the author of the rat-flea *Nosopsyllus fasciatus*. J. Soc. Bibliogr. nat. Hist. 3(2): 102.
- 1955b (26.IV) - Three subspecies of *Ctenophthalmus* congener Rothschild from the Far East (Siphonaptera: Hystrichopsyllidae). Proc. R. ent. Soc. Lond. (B) 24(3-4): 69-75, figs. 1-6.
- 1955c (1.V) - Description of the male sex of the bat-flea *Nycteridopsylla dictena* (Kolenati). Ent. Ber., Amst. 15(17): 383-386, figs. 1-2.
- 1955d (28.VII) - A new *Ctenophthalmus* (Siphonaptera: Hystrichopsyllidae) from France and Spain. Entomologist's mon. Mag. 91(1093): 145-147, figs. 1-3.
- 1955e (VIII) - Ordn.: Siphonaptera, Flöhe. Cat. Faun. Austriae XIXz: 1-10.
- 1955f (21.IX) - A list of the African Siphonaptera in the Natal Museum. Ann. Natal Mus. 13(2): 211-216.
- 1955g (XI) - [*Ischnopsyllus octactenus* at Orielson, Pembs.]. Nature Wales 1(3): 135.
- 1955h (6.XII) - Siphonaptera from Bariloche, Argentina, collected by Dr. J. M. de la Barrera in 1952 - 1954. Trans. R. ent. Soc. Lond. 107: 319-339, figs. 1-24.
- 1955i (6.XII) - Two new subspecies of fleas (Siphonaptera) from the British Isles. Trans. R. ent. Soc. Lond. 107: 341-356, figs. 1-79.
- 1955j (30.XII) - A new flea from Palestine. Proc. R. ent. Soc. Lond. (B) 24(11-12): 201-204, figs. 1-8.
- 1956a (17.IV) - A description of the male of *Atyphloceras nuperus palinus* (Jordan) (Siphonaptera: Hystrichopsyllidae). Proc. R. ent. Soc. Lond. (B) 25(3-4): 67-72, figs. 1-7.
- 1956b (7.VII) - Three new pulicoid Siphonaptera from Africa. Revue Zool. Bot. afr. 53(3-4): 305-316, figs. 1-21.
- 1956c (15.XI) - Redescriptions of fleas described by Nordberg in 1935. Opusc. ent. 21(2-3): 132-146, figs. 1-17.
- 1956d (28.XI) - Preliminary descriptions of two new European fleas. Entomologist's mon. Mag. 92(1107): 296.
- 1957a (I) - The recorded distribution and hosts of Siphonaptera in Britain. Entomologist's Gaz. 8(1): 45-75.
- 1957b (II) - Fleas on goats. Brit. Goat Soc. mon. J. 50(2): 22.
- 1957c (27.III) - The African species of the bat-flea genus *Lagaropsylla*. Revue Zool. Bot. afr. 55(1-2): 163-172, figs. 1-39.
- 1957d (21.VI) - Siphonaptera. Handbk Ident. brit. Insects 1(16): 1-94, figs. 1-200.
- 1957e (15.VII) - A new species of *Xenopsylla*, parasitic on rabbits in Morocco. Archs Inst. Pasteur Maroc 5(6): 201-205, figs. 1-4.
- 1957f (15.VII) - A new *Xenopsylla* from Morocco. Archs Inst. Pasteur Maroc 5(6): 262-267, figs. 1-9.
- 1957g (19.VIII) - Fleas of *Dolomys*, the Yugoslavian mountain vole. Ann. Mag. nat. Hist. (12)10(112): 305-319, figs. 1-26.
- 1957h (28.XII) - Two new bat-fleas of the genus *Lagaropsylla* from the Belgian Congo. Revue Zool. Bot. afr. 56(3-4): 263-268, figs. 1-16.

- 1957i (31.XII) - Siphonaptera from the Isles of Amsterdam and Kerguelen, collected by Patrice Paulian, and from Antipodes Island. Proc. R. ent. Soc. Lond. (B) 26(11-12): 189-196, figs. 1-16.
- 1957j (XII) - New Hystrihopsyllid Siphonaptera. Bull. Brit. Mus. nat. Hist., Ent. 6(2): 41-76, figs. 1-75.
- 1958a (12.IV) - Three new fleas from west Africa. Revue Zool. Bot. afr. 57(1-2): 60-67, figs. 1-13.
- 1958b (1.V) - A redescription of *Rhadinopsylla pitymydis* (Zav.) (Siphonaptera). Ent. Ber., Amst. 18(5): 99-102, figs. 1-6.
- 1958c (15.V) - A new North American bird-flea. Proc. U.S. nat. Mus. 108(3394): 51-57, figs. 1-10.
- 1958d (15.V) - Differences, in the female sex, between two North American bat-fleas. Proc. ent. Soc. Wash. 60(4): 175-177, figs. 1-5.
- 1958e (VII) - Fleas. Their medical and veterinary importance. Brit. Mus. nat. Hist., Econ. Ser. 3A: 1-20, colour frontispiece, figs. 1-6.
- 1958f (26.VIII) - The African species of *Stivalius*, a genus of Siphonaptera. Bull. Brit. Mus. nat. Hist., Ent. 7(2): 41-76, figs. 1-65.
- 1958g (30.VIII) - Siphonaptera from El Salvador. Senckenberg. biol. 39(3-4): 201-208, figs. 1-12.
- 1958h (26.IX) - A new bird-flea from Tasmania. Proc. Linn. Soc. N.S.W. 83(2): 173-180, figs. 1-10.
- 1958i (1.X) - Two new bat-fleas from Cambodia. Ent. Ber., Amst. 18(10): 199-203, figs. 1-10.
- 1958j (X) - A preliminary note on the occurrence of *Pulex irritans* L. and *Pulex simulans* Baker in North America. J. Parasit. 44(5): 523-526, figs. 1-2.
- 1958k (1.XII) - A new bat-flea from Borneo and Malaya. Ent. Ber., Amst. 18(12): 236-242, figs. 1-8.
- 1959a (1.III) - In memoriam Dr. Karl Jordan, 1861 - 1959. Ent. Ber., Amst. 19(3): 45-47, 1 fig.
- 1959b (30.XII) - A redescription of *Xenopsylla sarodes* (Siphonaptera, Pulicidae). Revue Zool. Bot. afr. 60(3-4): 296-300, figs. 1-5.
- 1959c (30.XII) - Two new Siphonaptera from the Belgian Congo. Revue Zool. Bot. afr. 60(3-4): 326-334, figs. 1-8.
- 1960a (4.III) - Records of Siphonaptera from the Pyrenees, with the description of a new species. Proc. R. ent. Soc. Lond. (B) 29(1-2): 11-16, figs. 1-3.
- 1960b (15.III) - New Siphonaptera from eastern Mediterranean countries. Bull. Brit. Mus. nat. Hist., Ent. 8(8): 337-366, figs. 1-41.
- 1960c (22.V) - Scratching hedgehogs. Sunday Times (7149): 8.
- 1960d (1.VIII) - Contribution à l'étude de la faune d'Afghanistan 26. Siphonaptera - Fleas. Ent. Ber., Amst. 20(8): 146-153, figs. 1-5.
- 1960e (12.VIII) - Notes on the shrew-flea *Doratopsylla dasyncema* (Rothschild). Bull. Brit. Mus. nat. Hist., Ent. 9(7): 359-367, figs. 1-9.
- 1960f (12.VIII) - Notes on *Palaeopsylla*, a genus of Siphonaptera. Bull. Brit. Mus. nat. Hist., Ent. 9(7): 369-386, figs. 1-19.
- 1960g (X) - The Dale collection of British Siphonaptera. Entomologist's Gaz. 11(4): 195-201.
- 1960h (31.XII) - Four new species of *Ctenophthalmus* (Siphonaptera). Tijdschr. Ent. 103(3-4): 277-284, figs. 1-14.

- 1960i (XII) - Mission zoologique de l'I.R.S.A.C. en Afrique orientale (P. Basilewsky et N. Leleup, 1957). LIV. Siphonaptera. Annls Mus. r. Congo belge, Sér. 8vo, Zool. 88: 345-364, figs. 1-30.
- 1960j (XII) - On two archaeological records of fleas. Proc. ent. Soc. Wash. 62(4): 262-264, figs. 1-2.
- 1961a (III) - Siphonaptera from the Falkland Islands. Entomologist 94(1174): 66-69.
- 1961b (15.VII) - Siphonaptera collected by Mr. G. B. Corbet in Kenya. Revue Zool. Bot. afr. 63(3-4): 357-371, figs. 1-9.
- 1961c (XI) - Contribution à la faune parasitaire de la région de Richelieu (Indre-et-Loire). Siphonaptères. Annls Parasit. hum. comp. 36(3): 328-329.
- 1961d (XII) - A description of the male of *Frontopsylla lapponica* (Siphonaptera: Leptopsyllidae). Entomologist 94(1183): 305-307, figs. 1-2.
- 1962a (24.IV) - A new sand-flea from Ecuador. Entomologist 95(1187): 89-93, figs. 1-3.
- 1962b (14.VII) - Siphonaptera collected from moles and their nests at Wilp, Netherlands, by Jhr W. C. van Heurn. Tijdschr. Ent. 105(2): 29-44, graphs 1-7.
- 1962c (14.VII) - Catalogus der Nederlandse Siphonaptera. Tijdschr. Ent. 105(3): 45-96, figs. 1-8.
- 1962d (10.VIII) - *Neotunga euloidea* gen. n., sp. n. (Siphonaptera: Pulicidae). Bull. Brit. Mus. nat. Hist., Ent. 12(7): 365-377, figs. 1-16, pl. I figs. A-C.
- 1962e (29.IX) - Three new fleas from Africa. Revue Zool. Bot. afr. 66(1-2): 195-202, figs. 1-12.
- 1962f (XI) - A description of the male of *Idilla caelebs*, with a discussion of the relationships of this species (Siphonaptera: Hystrichopsyllidae). Proc. R. ent. Soc. Lond. (B) 31(9-10): 109-114, figs. 1-2.
- 1963a (30.VI) - A new flea from Switzerland. Mitt. schweiz. ent. Ges. 36(1-2): 100-104, figs. 1-7.
- 1963b (8.IX) - Species-groups in *Ctenophthalmus* (Siphonaptera: Hystrichopsyllidae). Bull. Brit. Mus. nat. Hist., Ent. 14(3): 107-152, figs. 1-212.
- 1963c (20.XII) - The zoological results of Gy. Topál's collectings in south Argentina. 4. Siphonaptera. Annls hist.-nat. Mus. natn. hung. 55: 421-433, figs. 1-8, pl. I figs. 1-2.
- 1964a (1.II) - A new bird-flea from Japan. Ent. Ber., Amst. 24(2): 34-38, figs. 1-4.
- 1964b (20.II) - A new flea from Taiwan. Entomologist 97(1209): 45-48, figs. 1-6.
- 1964c (28.III) - Three new Siphonaptera from Nyasaland. Revue Zool. Bot. afr. 69(1-2): 92-102, figs. 1-7.
- 1964d (15.VII) - Insects of Campbell Island. Siphonaptera. Pacif. Insects Monogr. 7: 330-334, fig. 1.
- 1964e (IX) - Ergebnisse der zoologischen Nubien-Expedition 1962. Teil XXIII. Notes on Cleopatra's flea. Annln naturh. Mus. Wien 67: 603-606, figs. 1-3.
- 1964f (31.XII) - Siphonaptera. Explor. Parc natn. Garamba, Mission H. de Saeger 44(2): 41-47, fig. 1.

- 1965a (22.VII) - Siphonaptera collected by Dr. K. Zimmermann in north-east China (with a bibliography of Chinese Siphonaptera). *Ann. Mag. nat. Hist.* (13)7(80): 473-491, figs. 1-8.
- 1965b (6.VIII) - Siphonaptera of New Zealand. *Trans. R. Soc. N.Z., Zool.* 7(1): 1-50, figs. 1-16.
- 1965c (30.IX) - A new bat-flea from Ghana. *Revue Zool. Bot. afr.* 72(1-2): 135-137, figs. 1-5.
- 1966a (1.VIII) - Siphonaptera. *Insecta Helv., Cat.* 1: 1-107, figs. 1-36.
- 1966b (22.IX) - Siphonaptera. *Ergebnisse der zoologischen Forschungen von Dr. Z. Kaszab in der Mongolei.* *Reichenbachia* 7(31): 277-283, figs. 1-4.
- 1966c (1.XII) - Distribution of subspecies of the flea *Ctenophthalmus agyrtes* in and around Austria. *Ent. Ber., Amst.* 26(12): 216-221, figs. 1-3.
- 1967a (12.V) - Siphonaptera of Mongolia. Results of the Mongolian-German biological expeditions since 1962, No. 23. *Mitt. zool. Mus. Berl.* 43(1): 77-115, figs. 1-31.
- 1967b (30.IX) - A redescription of *Xenopsylla tanganyikensis* (Siphonaptera: Pulicidae). *Revue Zool. Bot. afr.* 76(1-2): 145-148, figs. 1-4.
- 1967c (20.X) - New data concerning Siphonaptera of Austria. *Annln naturh. Mus. Wien* 70: 255-275, figs. 1-21.
- 1968a (II) - De vlooiën (Siphonaptera) van de Benelux-landen. *Wet. Meded. K. ned. natuurh. Veren.* (72): 1-48, figs. 1-170.
- 1968b (31.VII) - Siphonaptera. *Explor. Parc natn. Albert* (2)21(1): 3-16, figs. 1-9.
- 1968c (VIII) - Siphonaptera taken from formalin-traps in Chile. *Zool. Anz.* 180(3-4): 220-228, figs. 1-3.
- 1969a (30.I) - A catalogue of the Siphonaptera of Finland with distribution maps of all Fennoscandian species. *Annls zool. fenn.* 6(1): 47-86, figs. 1-60.
- 1969b (X) - Fleas collected in Jersey by E. C. Newman. *Bull. Soc. jersiaise* 20(1): 44-46.

FAREWELL

On 7.VI.1980 it will be sixty years ago that I was born in Zutphen, The Netherlands.

Please note that on that date I must retire.

I shall no longer go to the British Museum (Natural History) in London [in a way a relief because the quality of 'service' of public transport in this country leaves infinite room for improvement and commuting wasted at least four hours a day]. Therefore, without access to the collection, literature and documentation, I can regrettably no longer be of any practical use to anyone with flea problems. In future, please contact Mr A. M. Hutson, Department of Entomology, B.M.N.H., for matters concerning the collection of fleas.

Fortunately, the museum authorities are enabling me to continue work - part-time at Tring - on the preparation of Volume VII (Malacopsyllidae and Rhopalopsyllidae) of the Rothschild Flea Catalogue. For communications relating to those two families I shall still be available at The Zoological Museum, Tring, Herts.

Unfortunately, it will henceforth not be possible for me to produce any more numbers of Flea News.

Dear colleague, it has been a privilege to have been in contact with you on matters of mutual interest. - Over the years I have experienced great friendliness and acts of sincere kindness and generosity from many and for this I am and remain particularly grateful.

There is always something to grumble about. Much could be said. But there is so much that is laudable - and silence is golden.

I wish you well.

May the jolliest of insects continue to fascinate you - as they have done me for the past 38 years.

F. G. A. M. Smit
