

FLEA NEWS

21

Department of Entomology
Iowa State University
Ames, Iowa 50011 U.S.A.

December 1980

C o l l e a g u e s : r e j o i c e !

When it became obvious that, because of my retirement, I could not possibly produce any further issues of Flea News (after No. 20), I did not approach anyone with a suggestion to consider taking over the chore; simply because the preparation of FN is a chore. Nevertheless, I had faint hopes that someone might like to volunteer to carry on the compilation of that news sheet. I was therefore truly delighted to learn from Dr R. E. Lewis that he, with the invaluable aid of his wife Joanne, would be prepared to attempt a revival of Flea News. Meanwhile, many colleagues expressed great disappointment and indicated that without FN they are quite lost. Actually, being isolated now myself, I no longer have an idea what is going on in the flea world or what is being published.

The Lewis team, and the Iowa State University of Science and Technology, deserve our profound gratitude for continuing the task of keeping all pulicologists well informed. This is no sinecure. Let all who are favoured as recipients of Flea News (which continues to be a free service) assist Bob and Joanne Lewis by providing them with any information which will be of use in their compilation work and which consequently will benefit all those who are privileged enough to study the jolliest of insects.

Flea News: ad multos annos !

Frans Smit

Compiled by Robert E. Lewis and Joanne H. Lewis

-o-

Please find herewith:

- lists of additional literature for 1973 (list 11), 1974 (list 12), 1975 (list 12), 1976 (list 9), 1977 (list 7), 1978 (list 8), 1979 (list 7) and 1980 (list 3)
- current mailing list

* * *

We plan to continue Flea News using much the same format as that set up by Frans Smit. It will be difficult, if not impossible, to match his fine example. We will endeavor to do so but, to make Flea News as informative and complete as possible, we need your cooperation.

We hope you will send us reprints of your publications promptly. We particularly need your cooperation in sending us copies of your work in Conference Proceedings and small or newly established journals which are not likely to be widely distributed in American libraries. This is especially important when descriptions of new taxa are involved. In the event reprints cannot be sent, please provide us with a complete citation of the work.

On our part, we will attempt to search the available literature for citations pertaining to fleas. To assist us, we are using several computer search services to broaden coverage of current literature not in the Iowa State University library. Each of these services scans literature in certain broad disciplines (e.g., agriculture). Our data base coverage includes Commonwealth Agricultural Bureau (CAB), U.S. National Agriculture Library (AGRICOLA), U.S. government documents (NTIS), ISI Science Citation Index (SCI) and Iowa State University library new books (OCLC).

When the computer gives us a citation, it will be verified against the original, if the original is in our library. When the source is not in our library, the citation often can still be verified in one of several indexes. If the citation cannot be checked in any way, we then will decide whether or not to include it in Flea News. When the title indicates any possibility that information on fleas is included in the publication, we will list it. An asterisk (*) preceding a citation will indicate to you that we have seen neither the original nor verified it in another source.

Whenever possible, titles will be given in the language of publication (exceptions: Russian and Chinese titles, following Mr. Smit's precedent). Computer translations will be used in most other cases.

One quirk of our computer is that only the first 9 letters of authors' names are printed out. When we cannot verify a citation, one or more of the authors' names therefore may be incomplete but certainly enough letters will be present for you to locate the citation should the source be available to you.

In addition to the computer searches, periodically we will scan journals not thus covered, first those in which flea papers have appeared most frequently in the past 8 years, then others as time permits.

We encourage you to send us newsworthy notes or observations for inclusion in Flea News, and we will try to present some items not bibliographic on occasion.

* * *

We both send you our warmest best wishes for the holiday season and the new year.

SOME UNITED STATES GOVERNMENT REPORTS OF INTEREST

A. I. Goncharov's 1973 paper, "Aedeagus morphology in fleas of the genus Paradoxopsyllus (Leptopsyllidae)", which was published in Parazitologiya 7: 264-269, is now available in English translation as TT-77-22693. It can be obtained from the National Translation Center, John Crerar Library, 35 West 33rd Street, Chicago, Illinois 60616, USA. Write NTC for current price.

Three other English translations of important Russian bibliographic literature can now be obtained from the National Technical Information Service (NTIS), U.S. Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161, USA. Unfortunately, NTIS cannot provide free copies of government reports; they are for sale only. Prices listed here for foreign users are 1980 prices, those given for North American users are 1981 prices. Please note that prices are always subject to change without notice.

Anisimov, P. I., T. I. Anisimova & Z. A. Koneva 1975
Plague Bibliography Russian Literature, 1740-1964. Part I.
 Document JPRS-66304-1, 273 pp. Transl. of mono. Chuma. Bibliografiya Otechestvennoi Literatury 1740-1964 GG, Saratov, 1968, p. 1-419. Price for foreign users: paper copy 30.00 (\$US), microfiche 5.25; for North American (i.e., Canada, USA, Mexico) users: pc 20.00, mf 3.50.

Anisimov, P. I., T. I. Anisimova & Z. A. Koneva 1975
Plague Bibliography Russian Literature, 1740-1964. Part II.
 Document JPRS-66304-2, 274 pp. Transl. of mono. Chuma. Bibliografiya Otechestvennoi Literatury 1740-1964 GG, Saratov, 1968, p. 1-419. Prices as for Part I.

Koneva, Z. A., N. I. Sokolova & E. F. Ramazaeva 1975
Bibliographic index to the plague (1965-1970).
 Document AD-A020 703/5GA, 264 pp. Transl. of mono. Bibliograficheskii Ukazatel K Chume, Saratov, 1974. Price for foreign users: paper copy 30.00 (US\$), microfiche 5.25; for North American users: pc 20.00, mf 3.50.

Two other reports of possible interest can also be purchased from NTIS.

Herrin, C. S. & V. J. Tipton 1976
Ectoparasites of African mammals.
 Document AD-A045 348/0GA, 9 pp. Price for foreign users: paper copy 10.00 (US\$), microfiche 5.25; for North American users: pc 5.00, mf 3.50.

Wisseman, C. L., Jr. 1975
Trombiculid mites (chiggers) and other ectoparasites as vectors of rickettsial infections.
 Document AD-A026 939/9GA, 13 pp. Price for foreign users: paper copy 10.00 (US\$), microfiche 5.25; for North American users: pc 5.00; mf 3.50.

One further government report of note

Jones, G. S. & D. B. Jones 1976
A bibliography of the land mammals of southeast Asia 1699-1969.
 Document AD-A026 734/4GA, 243 pp.

is reportedly available in paper copy from Bishop Museum Press, P.O. Box 6037, Honolulu, Hawaii 96818, USA. Write the Press for a price quotation.

ANOTHER NEWSLETTER

Attention is called to the "FRASS" newsletter published bi-annually by the Insect Rearing Group, currently composed of 575 scientists involved in rearing programs in 27 countries. The newsletter is a cooperative effort designed to provide a vehicle for communication among scientists involved in all aspects of insect rearing. Subscription to "FRASS" is free. To have your name placed on the mailing list, contact Ronald E. Wheeler, Chevron Chemical Company, 940 Hensley Street, Richmond, California 94804, USA. (Phone: 415-231-8167)

MAILING LIST

The mailing list for Flea News has grown from 77 names in 1974 to 130 names in 1980. The complete list is printed below. Please notify us promptly of any changes or corrections. We will continue sending Flea News to persons on the list unless you inform us you no longer have use for it.

Dr. M. H. Abreu, Museu e Laboratorio Zoologico e Antropologico (Museu Bocage), Faculdade de Ciencias, Lisboa, PORTUGAL

Dr. V. Aellen, Museum d'Histoire Naturelle de Geneve, Route de Malagnou, 1211 Geneve 6, SWITZERLAND

Prof. Dr. A. Aeschlimann, Institut de Biologie Animale, Université de Neuchâtel, 2000 Neuchâtel, SWITZERLAND

Dr. A. N. Alekseyev, Inst. Med. Parasit. & Trop. Med. "E. I. Martsinov", M-Pirogovskaya Street 20, 119 435 Moskva, U.S.S.R.

Dr. A. A. Arata, Vector Biology and Control, World Health Organization, 1211 Genève 27, SWITZERLAND

Dr. A. G. Avetisyan, Anti plague Station, Aygvestan 11 Street, No. 6, Yerevan 25, Armeniya, U.S.S.R.

Dr. B. G. Bagnall, Animal Health Division, Smith Kline & French Laboratories, Mundells, Welwyn Garden City, Herts. AL7 1EY, ENGLAND

Mr. C. R. Baird, P. O. Box 1058, Caldwell, Idaho 83605, USA

Mr. K. Baker, 2478 Oakview Drive, Rochester, New York 14617, USA

Dr. A. M. Barnes, Plague Branch, Vector-borne Diseases Division, Center for Disease Control, P.O. Box 2087, Fort Collins, Colorado 80522, USA

Dr. A. Barrera, Facultad de Ciencias, UNAM (Departamento de Biologia), Lab. de Sinecologia y Biogeografia, Ciudad Universitaria, Mexico 20, D.F., MEXICO

Dr. Klara Bartkowska, Uniwersytet im. Adama Mickiewicza, Katedra i Zaklad Zoologii Systematycznej, ul. Fredry 10, 61-701 Poznan, POLAND

Dr. J. C. Beaucournu, Faculte mixte de Medecine et de Pharmacie, Avenue du Professeur Leon Bernard, Rennes 35043C, FRANCE

Dr. A. H. Benton, Department of Biology, State University College, Fredonia, New York 14063, USA

Dr. W. P. Beresford-Jones, The Royal Veterinary College, Department of Pathology, Royal College Street, London NW1 0TU, ENGLAND
