

FLEA NEWS 22

Department of Entomology
Iowa State University
Ames, Iowa 50011 U.S.A.

June 1981

Compiled by Robert E. and Joanne H. Lewis

-o-

Please find herewith:

- lists of additional literature for 1973 (list 12), 1974 (list 13), 1975 (list 13), 1976 (list 10), 1977 (list 8), 1978 (list 9), 1979 (list 8), 1980 (list 4) and the first list for 1981
- additions, deletions and changes to the current mailing list

* * *

In the six months since we sent out Flea News 21 last December, a number of colleagues have written expressing their enthusiasm that the newsletter was to be continued. Your letters were most appreciated and we urge you all to inform us of your current researches and future plans in order that the recipients of Flea News may be kept informed.

* * *

Dr. Robert E. Elbel, an authority on the larvae of fleas, has recently completed a chapter on this subject for a volume tentatively titled "An introduction to immature insects of North America". This is to be an update of the two-volume classic by Alvah Peterson entitled "Larvae of insects; an introduction to Nearctic species". It is to be published by the Kendall/Hall Publishing Co. of Dubuque, Iowa, hopefully in late 1982.

* * *

Dr. George P. Holland recently informed me that he had finished the illustrations for the revision of his 1949 monograph, "The Siphonaptera of Canada". He hopes that the revised volume will be out this year.

* * *

I am aware of the existence of two bound copies of the rare Jordan & Rothschild 1915-1924 volume entitled "Ectoparasites". Both are for sale and interested parties should contact me for further details. According to Smit, in Flea News 10 (1977), the last complete sets of this series were sold 30 years ago.

* * *

A REQUEST - The editor of the highly authoritative "Handbuch der Zoologie" wishes to hear from anyone interested in writing a volume on Siphonaptera for that serial publication (it should cover every aspect of the study of fleas). Will those who are interested in, and capable of, undertaking such an important task please contact Dr. M. Fischer, Naturhistorisches Museum Wien, Postfach 417, Burgring 7, A-1014 Wien, Austria. --F.S.

* * *

ANOTHER REQUEST - Listed below are all of the new taxa described during 1980/81 which have come to our attention. If you know of additional new taxa, please send us the citation(s) (or better yet, a reprint) in order that we can compile the list of code numbers.

1980

Macrostylophora paoshanensis Li & Yan
Ceratophyllus nanshanensis Tsai, Pan & Liu
Mesopsylla hebes clara Smit
Genoneopsylla angustidigita Wu, Wu & Tsai
Genoneopsylla claviprocera Hsieh & Wu
Genoneopsylla bisinuata Liu, Chang & Liu
Vermipsylla qilianensis Wu, Tsai & Liu
Hystrichopsylla rotundisinuata Li & Hsieh
Callopsylla kazbegiensis Goncharov

1981

Nearctopsylla pfitzeri Benton
Amphipsylla kulkarnii Lewis
Vermipsylla ibexa Zhang & Yu

* * *

THE FOLLOWING PAPERS were presented at the annual meeting of the Entomological Society of America, Atlanta, Georgia, 30 November-4 December 1980.

Rust, M. K., J. Silverman & D. A. Reiersen
 Simulated Field Tests of Total-release Aerosols Against Cat Fleas Indoors.

Silverman, J.
 Abiotic Factors Influencing the Development and Survival of the Cat Flea Ctenocephal[ide]s felis.

Silverman, J. & M. K. Rust
 Factors Stimulating Adult Cat Flea, Ctenocephalides felis, Emergence from the Cocoon.

Smith, S. A.
 Sexual Dimorphism of the Antennae of the Bat Flea, Myodopsylla insignis.

MAILING LIST

ADDITIONS:

- Dr. J. W. Amrine, Dept. of Biology, West Virginia University, Morgantown, West Virginia 26506 USA
- Dr. Wolfgang H. O. Dorow, Rendelerstrasse 25, 6000 Frankfurt 60, WEST GERMANY
- Dr. Emmett R. Easton, Dept. of Plant Science, South Dakota State University, Brookings, South Dakota 57007 USA
- Dr. R. P. Eckerlin, Natural Sciences Division, Northern Virginia Community College, 8333 Little River Turnpike, Annandale, Virginia 22003 USA
- Dr. O. R. Larson, Dept. of Biology, Box 8238 University Station, Grand Forks, North Dakota 58202 USA
- Dr. Y. Schlein, The Hebrew University, Dept. of Medical Entomology, Hadassah Medical School, P.O. Box 1172, Jerusalem, ISRAEL

Mr. A. J. Shepherd, National Institute for Virology, Private Bag X4,
Sandringham 2131, Transvaal, SOUTH AFRICA

CHANGES:

Dr. A. A. Arata, Project Leader, AMRO 0902, Apartado 2171, Las Delicias, Maracay,
VENEZUELA

Dr. W. P. Beresford-Jones, Sand Banks, Maidstone Road, Seal, nr Sevenoaks, Kent
TN15 0EH, U.K.

Mr. L. S. Cuy, Forest Biological Sciences, College of Forestry, University of the
Philippines at Los Banos, College, Laguna 3720, PHILIPPINES

Dr. R. E. Elbel, Dept. of Biology, University of Utah, Salt Lake City, Utah 84112 USA

Dr. K. C. Emerson, Sanibel Island, Florida 33957 USA

Dr. G. E. Haas, 404 West Santa Fe Avenue, #104, Flagstaff, Arizona 86001 USA

Dr. R. Iyengar, c/o Program Coordinator, P.O. Box 14, 11 Goodliffe Road, Rangoon,
BURMA

DELETIONS:

Dr. B. G. Bagnall

Dr. J. Wilson

THE 1ST ALL-UNION CONFERENCE OF PARASITOCOENOLOGISTS was held at Poltava,
Ukraine, USSR, in September 1978. Abstracts of conference papers were published
in 3 volumes edited by A. P. Markevich. CAB computer tapes yielded the following
abstracts of interest, all published in Vses. s'ezd parazitotsenologov. Tez. Dokl.
Chast' 1, 2, 3. We have not seen these volumes nor references to published papers.

Grebenyuk, R.V., A.M. Kadysheva, P.A. Chirov, S.K. Kasiev, N.M. Madalov & S.K.
Sartbayev - Ectoparasites of common species of birds, nest-dwellers, and their
epizootological importance. (1): 100-101

Khodykina, Z.S. - Ectoparasites of the domestic mouse (*Mus musculus hortulanus*
Nordman) in the Crimean steppe. (2): 120-121

Khodykina, Z.S. & E.V. Sadovenko - The effect of the physiological condition of
the host on the fecundity of the Indian rat flea *Xenopsylla cheopis* Roths.
(2): 121-122

Nazarova, I.V. & R.A. Jarullova - Some problems of the specificity of fleas. (2):
28-29

Povalishina, T.P. - Ectoparasites of small mammals as components of the biocoen-
osis of a natural focus on haemorrhagic fever with nephritic syndrome. (2):
53-55

Ryl'tseva, Ye.V. & T.P. Povalishina - Fleas and small mammals of the island of
broad-leaved forest in the Tula Region. (2): 65-66

Sadekova, L.Kh. - Biocoenotic relations between ectoparasites of the wood mouse
and inhabitants of its nest. (2): 68-69

Sapegina, V.F., Yu.S. Ravkin & I.V. Lukyanov - Features of the relationship of
Leptopsylla (*Peromyscopsylla*) *silvatica* (Meinert) (Siphonaptera) with their
hosts in the forest zone of western Siberia. (2): 74-75

Vakhrusheva, Z.P. & I.F. Zhovtyi - Interpopulation relationships in the taxo-
coenosis of fleas of Brandt's vole in southeastern Transbaikalia. (1): 70-71

* * *

The following papers and abstracts appear in the Proceedings of the International Conference on Fleas, Ashton Wold, Peterborough, U.K., 21-25 June 1977, edited by R. Traub & H. Starcke. A. A. Balkema, Rotterdam, x, 420 pp. (1980).

RECENTLY PUBLISHED - The Audubon Society Encyclopedia of North American Birds by John K. Terres, 1980 (ISBN 0-394-46651-9), Alfred A. Knopf, New York, i-xxv, 1109 pp. [Siph.: 356, other ectoparasites: 251]

Twenty years in the writing, this beautifully printed and lavishly illustrated volume certainly represents one of the most ambitious projects ever undertaken by a single author. As the world-renowned ornithologist, Dean Amadon, says in his forward, "Nothing, it seems, has been omitted that would be of particular interest to readers, and many subjects have been included that most of us in making such a compilation would have overlooked." It is arranged alphabetically from "abdomen" to "zygote". In addition to the general family treatments, each species is discussed, including description, food and feeding habits, nest, eggs and incubation, other names, age, flight speed, hybrids, weights and range, where such information is available. The volume contains a veritable wealth of information and is a must for every naturalist's library. --R.E.L.
