

FLEA NEWS 27

Department of Entomology
Iowa State University
Ames, Iowa 50011 U.S.A.

December 1983

Compiled by Robert E. and Joanne H. Lewis

-O-

Please find herewith:

- lists of additional literature for 1973 (list 13), 1974 (list 16), 1975 (list 16), 1976 (list 15), 1977 (list 13), 1978 (list 14), 1979 (list 13), 1980 (list 9), 1981 (list 6), 1982 (list 4), and 1983 (list 2).
- additions, changes, and deletions to the mailing list
- an addition to the bibliography of publications by C. A. Hubbard
- numbers for the species of fleas described in 1981

* * *

TRAUB HONORED - A SYMPOSIUM entitled "Topics in the Natural History of Some Vector-Borne Infections" was held at the University of Maryland School of Medicine, Baltimore, on Saturday, 19 November 1983, in honor of Professor ROBERT TRAUB. The program was moderated by Dr. C. L. Wisseman, Jr., Chairman of the Department of Microbiology, University of Maryland, and included the following presentations:

"Comparison of the prevalence of murine typhus and Hantaan virus in Egyptian rodents" by Harry Hoogstraal

"Pheromones and the biology of disease transmitting ticks" by Daniel E. Sonenshine

"Spiroplasmas, vectors and history" by Karl Maramorosch

"Biotic relationships among the southern landmasses" by R. E. Lewis

"Distributional patterns of the rodents of Africa" by Duane A. Schlitter

The symposium was followed by a social hour and banquet attended by approximately 80 friends and family. Several of Prof. Traub's colleagues recalled incidents and accomplishments from the days when they had worked with him on one or more of his projects. Prof. Traub was presented with a book of letters from many of his friends and coworkers. The Honourable Miriam Rothschild presented him with the first bound copy of their joint work on ceratophyllid fleas, due to be released officially on 20 December 1983. A review of this study is planned for FLEA NEWS 28.

Although Prof. Traub is retiring from his administrative duties at the University of Maryland, he plans to continue his research activities there and at the National Museum of Natural History. FLEA NEWS is proud to have participated in this celebration of Prof. Traub, and joins his other friends in wishing him many productive years of research in the future. ---R.E.L. & J.H.L.

* * *

THE FOLLOWING NOTE was submitted by Dr. Alexander Dudich for inclusion in FLEA NEWS.

István Szabó is 70 years old

István Szabó was born in Budapest on the 13th of June, 1913. He worked in business administration until 1957, when he joined the Department of Zoology of the Hungarian Natural History Museum. His early scientific papers dealt with amphibians and reptiles, but later on almost exclusively with fleas. It was Mr. Szabó who established the Parasitological Collection of the Department of Zoology of the Hungarian Natural History Museum, where he worked as curator until his retirement in 1975. He has continued his studies since retirement. We wish to congratulate Mr. Szabó on the occasion of his 70th birthday!

* * *

CONGRATULATIONS - Bernice Williams defended her doctoral thesis successfully on 29 June 1983 at Oxford, England. Examiners were Prof. T.R.E. Southwood and Dr. Miriam Rothschild. Dr. Williams is now with the National Museum of Wales (see Change of Address section).

* * *

TIPTON RETIRES - Dr. Vernon J. Tipton recently retired from the Zoology Department at Brigham Young University, Provo, Utah. His current address is Ireland Dublin Mission, "Castle Court", Main Street, Castleknock Co., Dublin, Ireland.

* * *

ADDITION to the BIBLIOGRAPHY of C. A. HUBBARD

Dr. Harold J. Egoscue has called to our attention an early paper by Dr. Hubbard which we omitted from the bibliography in FLEA NEWS 26, pp. 6-9.

1922 Some data upon the rodent Aplodontia. The Murrelet 3(1): 14-18

CONFERENCE PAPERS

At the fourth annual International Symposium of the Whitmire Institute of Technology in Advanced Pest Management held in St. Louis, Missouri, August 8-10, the following paper dealing with fleas was presented:

Rust, M. - Fleas - Update.

The annual meeting of the Entomological Society of America, to be held November 28-December 1, 1983 at Detroit, Michigan, USA, has two papers on fleas scheduled:

Lang, J. T. & W. F. Chamberlain - Preliminary field evaluation of Methoprene for flea control on Mexican ground squirrels (*Spermophilus mexicanus*).

Osbrink, W. L. A. & M. K. Rust - Factors influencing the attraction of the adult cat flea to its host.

* * *

NEW JOURNAL - The Arab Bureau of Education for the Gulf States has just released volume 1, number 1, of a new journal entitled Arab Gulf Journal of Scientific Research. This journal, to be published biannually in June and December, addresses itself to original research in the pure and applied sciences. Included in the Basic Sciences are Botany, Chemistry, Earth Sciences, Mathematics, Physics, and Zoology. Applied Sciences include the Agricultural Sciences and Applied Microbiology. Personal annual subscriptions are US\$20.00. Inquiries should be sent in care of P.O. Box 3908, Riyadh 11481, Kingdom of Saudi Arabia.

---R.E.L.

RECENTLY PUBLISHED - Walker's Mammals of the World, 4th Edition by R. M. Nowak and J. L. Paradiso, 1983. (ISBN 0-8018-2525-3) The Johns Hopkins University Press (Baltimore and London), Vol. I, i-xliv, 1-568 (xlvii-lxi); Vol. II, i-vii, 569-1362 (xi-xxv). US\$65.00 (2 volume set).

Very often, the appearance of a new edition of a text involves little more than a different binding, an additional preface, and an increase in price. Not so with this monumental revision of Ernest P. Walker's classic, Mammals of the World, which first appeared in 1964 with subsequent editions in 1968 and 1975. This new edition incorporates major changes in format and content. While the overall length of the text has been expanded by almost 50 per cent, the physical size of the volumes remains approximately the same. About 90 per cent of the generic accounts have been substantively altered and many have been completely rewritten.

In this edition, the authors have broken with the tradition of treating each genus on a single page and have expanded accounts of the genera where more data were available. Sections covering the physical description of the genera remain the same as in earlier editions but the remaining text has been transmogrified. Accounts of the orders and families precede the generic accounts and include information applicable to all members of the group. Where possible, generic accounts include: scientific and common name, number and distribution of the species, measurements, physical description, habitat, locomotion, daily and seasonal activity, diet, population dynamics, home range, social life, reproduction, longevity, and interactions with humans. No emphasis has been placed on internal anatomy, physiology, genetics, laboratory experimentation, parasitology, pathology, or paleontology. The World Distribution Charts at the beginning of Volume I have been revised to reflect changes in taxonomy and distributional information. Approximately 350 new photographs are included, either to replace or supplement earlier illustrations, and approximately 100 additional genera have been illustrated.

An innovation over earlier editions is the inclusion of species lists. Where possible, these are arranged in systematic order, including subgenera where designated. Where this information was lacking, the species are listed alphabetically.

The total number of taxonomic categories accepted in this edition are: 19 orders, 134 families, 1018 genera, and 4154 species. The authors consider coverage of descriptions of new species and major taxonomic revisions complete to the end of 1979, but much information published through late 1981 is included.

---continued next page

The volumes are attractively printed on an excellent grade of paper which greatly improves the quality of the photographic reproduction. The end papers contain comparisons of U.S. and metric measurements, but only metric units are used in the text. The type size has been greatly reduced to accommodate for the expanded text, but this certainly does not detract from the attractiveness of the printed page.

It is evident that the authors were devoted to the task of revising this monumental work, and in doing so have greatly improved its usefulness, especially to the nonspecialist. While the price might at first seem high, close examination of these two volumes should convince the reader that they would be a bargain at twice the price. ---R.E.L.

A PREFATORY NOTE TO THE SPECIES LIST - In keeping with Mr. Smit's practice of numbering the taxa chronologically, the following list includes numbers for those species described in 1981 only. Readers are urged to call any omissions in these lists to our attention. Numbers will be assigned to 1982 taxa in 1984.

- 98101 pfitzeri Benton, 1981 Nearctopsylla
- 98102 kulkarnii Lewis, 1981 Amphipsylla
- 98103 ibexa Zhang & Yu, 1981 Vermipsylla
- 98104 faini Beaucournu, 1981 Areopsylla
- 98105 suciuae Beaucournu & Grulich, 1981 Ctenophthalmus (Ctenophthalmus) bisoctodentatus
- 98106 abazhouensis Liu, Liu & Zhai, 1981 Macrostylophora
- 98107 badongensis Ji, Chen & Wang, 1981 Amphalius spirataenius
- 98108 kunlunensis Yu & Wang, 1981 Amphalius clarus
- 98109 shansiensis Liu, Hsing & Chen, 1981 Ischnopsyllus (Hexactenopsylla)
- 98110 tuoliensis Yu & Zhang, 1981 Frontopsylla (Frontopsylla)
- 98111 chayuenensis Wang & Liu, 1981 Nosopsyllus (Nosopsyllus)
- 98112 hemisphaera Liu, Chen & Liu, 1981 Geusibia
- 98113 rahmi Beaucournu, 1981 Ctenophthalmus (Idiostenophthalmus) hopkinsi
- 98114 elblae Beaucournu, 1981 Ctenophthalmus (Idiostenophthalmus)
- 98115 occidentayunnanensis Li, Xie & Gong, 1981 Lentistivalius
- 98116 laxilobulus Li, Xie & Gong, 1981 Stivalius
- 98117 hylomysus Li, Xie & Gong, 1981 Aviostivalius
- 98118 acutilobatus Wei, Chen & Liu, 1981 Ctenophthalmus (Euctenophthalmus)
- 98119 sichuanensis Wei, Chen & Liu, 1981 Doratopsylla coreana
- 98120 forfica Wu, Chen & Liu, 1981 Callopsylla (Callopsylla)
- 98121 culter Beaucournu, Valle & Launay, 1981 Ctenophthalmus (Ctenophthalmus) agyrtes
- 98122 celatus Beaucournu, Valle & Launay, 1981 Ctenophthalmus (Ctenophthalmus) egregius
- 98123 niethammeri Beaucournu, Valle & Launay, 1981 Ctenophthalmus (Ctenophthalmus) egregius
- 98124 aspromontis Beaucournu, Valle & Launay, 1981 Ctenophthalmus (Ctenophthalmus) egregius
- 98125 calabricus Beaucournu, Valle & Launay, 1981 Ctenophthalmus (Euctenophthalmus) savii

PROVISIONAL LISTS OF TAXA DESCRIBED IN 1982 AND 1983---

1982

Echidnophaga tenerifensis Gil Collado, Rodriguez Rodriguez & Zapatero Ramos
 Ceratophyllus (Ceratophyllus) chasteli Beaucournu, Monnat & Launay
 Amalaraeus dissimilis daghestanicus Labunets
 Neopsylla stevensi sichuanyunnana Wu & Wang

---continued next page

(1973)

Ctenocephalides chabaudi Beaucournu & Bain
Vermipsylla perplexa centrolasia Liu, Wu & Wu
Paraneopsylla clavata Wu, Lang & Liu
Geusibia aprominus xizangensis Liu, Gao & Liu
Frontopsylla (*Frontopsylla*) *xizangensis* Liu & Liu
Plocopsylla angusticeps Mahnert
Hectopsylla gracilis Mahnert
Spuropsylla monoseta Li, Xie & Gong
Palaeopsylla chiyangi Xie & Yang
