NEW JOURNAL - Acta Zoologica Mexicana is a new series begun by the Instituto de Ecologia, Mexico, D.F. It will include papers dealing with behavior, ecology, systematics and zoogeography of the North American fauna. Submissions may be in Spanish, Portuguese, English or French, and should include a summary in either Spanish or English. The Instituto expects to produce a minimum of six issues per year. Manuscripts will be reviewed by an international editorial committee.

NOTES

NOTICE - We have recently been informed that persons with matters pertaining to the Siphonaptera collection at the British Museum (Natural History) should contact Dr. A. J. SHELLEY, Head, Medical Diptera Section, Cromwell Road, London SW7 5BD, England.

NOTES

CONGRATULATIONS - Wolfgang Dorow has been awarded the Diploma of Biology from the University of Frankfurt, West Germany, for his work about Siphonaptera and Protocalliphora in the nests of the Great and Blue Tits (Parus major, Parus caeruleus). His work deals with abiotic and biotic factors affecting the flea population in a bird's nest, with the influence of the parasites on the host. Also, methods of sampling fleas out of birds' nests, sex-ratio and strategies of host-finding and parasite-avoidance are discussed.

Prof. J. C. Beaucournu has reported the successful completion of the doctorate degree from the University of Rennes by his student, JEAN DEUNFF, in May of this year. Prof. Beaucournu kindly presented us with a copy of Dr. Deunff's dissertation entitled "Parasites de Siphonaptères", pp. 406. Our congratulations to Dr. Deunff and our thanks for this addition to our library.

The 35th International Science Fair took place at Ohio State University, Columbus, May 7-13, 1984. There were 585 entries, 17 of which were entomological in nature. The Entomological Society of America made three cash awards, one of which was won by Julie Blake, 14, Suwanee High School, Live Oak, Florida, for her project Controlling the Common Cat Flea. The other winners were from England and Puerto Rico for projects on climbing ability of cockroaches and the life cycle of Sevicocer krugii.
