FIRST EUROPEAN CONFERENCE ON FLEAS

As was announced in Flea News No. 2, this three-day conference will be
held in Lund, Sweden. The dates have now been fixed: Tuesday 3.VI.1975
till Thursday 5.VI.1975 inclusive.

The idea for such a meeting has been received with enthusiasm and
participants are already hopefully expected from Canada, U.S.A., England,
Netherlands, Germany, Czechoslovakia, Hungary, România, Sweden and the
U.S.S.R.

Meanwhile application forms have been sent from Lund to those who plan
to attend the conference and also to those who, we hope, may still have a
chance to make arrangements for the trip.

MAILING LIST

(distributed with Flea News No. 2)

Additions:

Dr A. A. Arata, Vector Biology and Control, World Health Organization,
1211 Genève 27, SWITZERLAND

Dr J. S. Fairley, Zoology Department, University College, Galway,
Republic of IRELAND

Dr N. G. Gratz, address as that of Dr A. A. Arata

Dr R. Iyengar, U.N. Development Programme, P.O.Box 2048, Alwiyah, Baghdad,
IRAQ

Dr A. N. Talybov, Anti plague Station, Ul. Bagdasara Avakyana, block 3161,
370 602 Baku, Azerb.S.S.R., U.S.S.R.

Mr G. B. Thompson, 56 Beaumont Road, Cambridge CB1 4PY, ENGLAND

Changes:

Dr A. Barrera, Facultad de Ciencias, UNAM, Depto. de Biología, Lab. de
Sinecología y Biogeografía, Ciudad Universitaria, México 20, D.F.,
MEXICO

Dr M. J. Cotton, Churchtown Farm Field Studies Centre, Lanlivery, Bodmin,
Cornwall, ENGLAND

Dr L. Kartman [now retired], 15bis, rue Valentine, 92190 Meudon, FRANCE

Dr J. M. Klein, Bd Charlemagne 10, 57100 Thionville, FRANCE

Dr V. J. Tipton, Director, Center for Health and Environmental Studies,
786 WIDB, Brigham Young University, Provo, Utah 84601, U.S.A.

Deletions:

With deep regret the death is announced of:

Dr Radiy Boleslavovich Kosminsky (Died 15.VI.1974) and Dr E. V. Isayeva

* * *

Enquiries have been made about two titles in the bibliography of Smit's 1973 chapter on fleas in K.G.V. Smith's "Insects and other arthropods of medical importance" (the price of which has now been increased [from £6.50] to £15; reprints of the flea chapter are not available), namely:

Smit, F.G.A.M., 1974, An annotated list of pathogens, parasites and enemies of fleas (in press)

Smit, F.G.A.M. & Wright, A.M., 1974, Siphonaptera. Catalogue of type data, 1758-1972 with code-number list, host list, gazetteer and bibliography. (in the press)

The preparations for these two planned publications were well advanced when the chapter was being written, i.e. some five years ago. Since then there has unfortunately not been the time and opportunity to finalize the preparations for the MSS. Moreover, after having assisted me cheerfully for nearly 19 years, Mrs Alyn Mary Wright (co-author of the type-data catalogue) left the Museum in March 1973 (as she and her family moved away from Tring).

Optimistically I am looking forward to finishing those two publications in 1975. The list of type material will then include all nominal taxa described before 1975; each has been given a five-digit code-number (as a kind of short-hand and for potential computer usage).

For the completion of the annotated list of non-host organisms associated with fleas I must still check a number of papers which are not available to me. These are listed below. If anyone can lend me any of these publications, I shall be grateful. The desiderata are:

- Alvares, C.D. & da Silva, 1911, Med/na contemp. 14(25): 197-198; (27): 216.
