

Produced by [R.E. Lewis](#), [Department of Entomology](#), Iowa State University, Ames, Iowa 50011

FLEA NEWS is a biannual newsletter devoted to matters involving insects belonging to the order Siphonaptera (fleas) and related subjects. It is compiled and distributed free of charge by Robert E. Lewis, with the support of the Department of Entomology at Iowa State University at Ames, IA, and a grant in aid from **Sandoz Animal Health**, based in Des Plaines, IL. It is mainly bibliographic in nature. Many of the sources are abstracting journals and title pages and not all citations have been checked for completeness or accuracy. Additional information will be provided upon written request. Further, recipients are urged to contribute items of interest to the profession for inclusion herein.

I am particularly interested in obtaining E-mail addresses for a directory of recipients and hope, beginning with this issue, to make Flea News available on the Internet. If your World-Wide Web browser supports the "mailto:" function, you can [click here to send me your name, mailing address, and e-mail address](#).

OBITUARIES

Joanne Harriett ("Mike") Lewis

4-February-1932 - 6-February-1994

It is with a heavy heart that I report the death of my wife, colleague and best friend, Joanne, of a massive heart attack.

Joanne (Hauschild) Lewis was born in Cleveland, Ohio. She attended the Richmond, Indiana, school system and we were wed in that city in June of 1952. She attended classes in nursing at Reid Memorial Hospital and Earlham College, both in Richmond, and German and other subjects at the University of Illinois, Urbana, IL. In 1959 she accompanied me to the American University of Beirut, in Lebanon, where she served as a research assistant and as my assistant curator of the Natural History Museum. In 1967 we returned to the United States, taking up residence in Ames. There she was employed by the Ames Laboratory (DOE) from 1969 to 1974. From 1974 until her death she was a collaborator on a number of

projects dealing with ectoparasitic insects and their hosts. She was co-author of eight technical papers and two books on the subject, as well as co-editor of this newsletter.

She served on the Rules Committee of the National Organization of the Embroiderer's Guild of America, was active in the Heartland Region of the Guild, and was past president of the Ames Chapter. She was also a member of Netekar Temple No. 11 of the Daughters of the Nile, and Laura Chapter No. 115 of the Order of Eastern Star.

The *Joanne H. Lewis Library Endowment Fund* has been established at Iowa State University in her memory.

Tuti R. Hadi

25-July-1943 * 13-March-1993

The latest issue of the *Bulletin of the Society of Vector Ecology* (18[2]: xii) carried the short obituary of Dr. T. R. Hadi upon which the following is based.

Dr. Hadi was born in Bandung, Java, and succumbed to meningitis at the age of 49. She earned Bachelor's, Master's and Doctorate degrees from various Javanese Universities and earned a second Master's degree from the University of Hawaii (Manoa) in 1980. From 1976 to 1978 she was Senior Technician, and later Research Scientist at the United States Naval Medical Research Unit No. 2 (NAMRU-2) in Jakarta. There she collaborated with a number of American colleagues (Carney, Cross, Dennis and van Peenan) on entomological and parasitological surveys throughout the Indonesian Archipelago. From 1976 until her death she pursued similar studies as a Research Scientist with the National Institute for Health Research and Development of the Indonesian Ministry of Health in Jakarta. Her interests were broad and included vector-borne diseases and their reservoirs, especially scrub typhus, murine typhus and plague. She was particularly focused on scrub typhus and the taxonomy of its chigger vectors and it was in this specialty that she performed her most detailed studies. Her passing deprives the region of a major source of expertise in acarology, and certainly one of its leading vector biologists.

MISCELLANEA

Dr. Ralph P. Eckerlin has requested that the following notice be included in this issue of Flea News.

The first call for papers has been sent out for the symposium entitled **Appalachian Biogeography** scheduled for June 25-29, 1995 at Virginia Polytechnic Institute and State University, Blacksburg, VA. Papers are requested relating to the present or historical biogeography of the Appalachians and factors influencing Appalachian biogeography. Specifically, papers are sought from the following disciplines: **Botany, Geology, Invertebrate Zoology, Palaeobiology, Palaeoclimatology, Physical Geography & Vertebrate Biology.**

The proceedings resulting from this symposium will be published and all presenters are urged to submit manuscripts for peer review. Titles and abstracts are requested by December 15, 1994. Titles may be submitted and information requested from: **Dr. Ralph P. Eckerlin, Natural Sciences Division, Northern VA Community College, 8333 Little River Turnpike, Annandale, VA 22003-3796, Fax (703) 323 3215**

Wanted

A copy of Holland's *The fleas of Canada, Alaska and Greenland (Siphonaptera)*. Will pay fair price plus postage. Contact J. Kucera, 5930 S. Sultan Circle, Murray, UT 84107.

Mailing List Additions

Broce, Alberto B., Waters Hall, Kansas State University, Manhattan, KS 66506-4004.

Nezvesky, L. O., 1785 Boston Avenue, Suite 2, Bridgeport, CT, 06610-2608.

Research Notes

Kim Larsen & Alice Oleson (*vide* Bille, 1993) of the Danish Pest Infestation Laboratory report the following studies on fleas in progress in their institution: 9.1 Fleas and farmed mink. 9.2 The squirrel flea *Ceratophyllus*[(*Monopsyllus*)] *sciurorum sciurorum*. 9.2.1 Rearing fleas. 9.2.2 Survival and development related to temperature and humidity. 9.2.3 Flea behavior. 9.3 The cat flea. 9.3.1 Transmission experiments with *Afipia felis* by use of membrane-fed cat fleas. 9.3.2 Development of cat fleas during the year in Denmark. 9.3.3 Focusing on the substrates when evaluating the efficacy of insecticides.

PUBLICATIONS AVAILABLE

The following papers are excess duplicates in the National Museum of Natural History reprint files. In an effort to make this information available to researchers they are offering copies of these papers free of charge upon request. They are offered on a first-come-first-serve basis and the number of copies available is usually indicated in parentheses [()] after the citation. Researchers are also requested to supply the NMNH with copies of their works when possible.

Requests may be directed to:, **Ms. Nancy Adams**, Department of Entomology, NMNH, Smithsonian Institution, MRC 105, Washington, DC 20560

Following is the inventory listed by insect order.

Anoplura

Durden, Traub & Emerson, 1990. Sucking lice (Anoplura) from Pakistan mammals, with notes on zoogeography. (8)

Emerson & Kim, 1968. Records of Anoplura from South West Africa. (14)

Johnson, 1957. The identity of *Pediculus spiculifer* Gervais (Anoplura). (200)

Descriptions of two new species of *Eulinognathus* Cummings, and redescription of *E. aculeatus* (Neumann) (Anoplura). (17)

1958. Type specimens of lice (Order Anoplura) in the United States National Museum. (32)

A new species of Anoplura from the Philippines. (29)

1959. The rodent-infesting Anoplura (Sucking lice) of Thailand, with remarks on some related species. (8)

1960. A new species of *Hoplopleura* from Australia (Anoplura: Hoplopleuridae). (119)

The Anoplura of African rodents and insectivores. (17)

1962. Redescriptions of two cervid-infesting Anoplura from southeast Asia. (52)

Notes and descriptions of African lice. (Anoplura) (4)

Three new Anoplura from African rodents (Anoplura: Hoplopleuridae). (37)

The species of *Fahrenholzia* Kellogg and Ferris from spiny pocket mice (Anoplura: Hoplopluiridae). (37)

1963. Two rare Anoplura from Kenya. (64)

1964. The hoplopleurid lice of the Indo-Malayan Subregion (Anoplura: Hoplopleuridae). (31)

1969. *Haemophthirius galeopithecii* Mjoeberg rediscovered; with the description of a new family of sucking lice (Haemophthiriidae). (70)

1972. *Hoplopleura intermedia* and its allies, with the description of a new species (67)

On the rodent-infesting Anoplura of Panama. (90)

Sucking lice of Venezuelan rodents, with remarks on related species. (38)

Neohaematopinus appressus, a new species of sucking louse from an Asian tree squirrel. (23)

Polyplax rhizomydis, a new species of sucking louse from Asian bamboo rats. (27)

Two new species of *Hoplopleura* from Loatian murids. (29)

Scanlon & Johnson, 1957. On some microtine-infesting *Polyplax* (Anoplura). (43)

Wenzel & Johnson, 1966. Checklist of the sucking lice of Panama (Anoplura). (63)

Anoplura & Mallophaga

Emerson, Maser & Whitaker, 1984. Lice (Mallophaga & Anoplura) from mammals of Oregon. (3)

Mallophaga

Carriker, 1944. Studies in Neotropical Mallophaga (III). (4)

1949. On a collection of Mallophaga from Guam, Marianas Islands. (60)

Some bird lice of the genera *Acidoproctus* and *Quadriceps* (Neotropical Mallophaga Miscellany No. 3). (35)

1954. Studies in Neotropical Mallophaga, XI: Bird lice of the Suborder Amblycera, genus *Dennyus* Neumann. (10)

1957. Studies in Neotropical Mallophaga, XVI: Bird lice of the Suborder Ischnocera. (7)

1960 Studies in Neotropical Mallophaga, XVII: A new family (Trochiliphagidae) & a new genus of the lice of hummingbirds. (6)

1963. New and little known Mallophaga from Venezuelan birds (Part II). (21)

1966. A revision of the genus *Furnaricola* (Mallophaga) with descriptions of new species. (23)

Cicchino & Emerson, 1983. Contribucion al conocimiento de los malofagos Argentinos. XIV. Philopteridae nuevos poco conocidos parasitos de Rallidae. (17)

Elbel, 1967. Amblyceran Mallophaga (biting lice) found on the Bucerotidae (hornbills). (26)

Elbel & Emerson, 1960. A new species of *Kurodaia* from collared Scops owl of Thailand. (3)

Emerson, 1948. Two new species of Mallophaga. (8)

1949. A new species of Mallophaga from a partridge. (3)

North American Menoponidae (Mallophaga). III. Notes on some of Kellogg's types. (2)

Three new species of Mallophaga. (14)

1950. New species of *Goniodes*. (17)

The genus *Lagopoecus* in North America. (2)

1952. A new species of *Trogoninirmus* (Philopteridae: Mallophaga). (40)

1953. New North American Mallophaga. (37)

A new species of *Carduiceps*. (40)

1954. Two new species of *Machaerilaemus*. (39)

Three new African species of *Clayia*. (4)

1955. A review of the genus *Rallicola* found on Aramidae, Psophiidae and Rallidae. (9)

A new mallophagan from the screech owl. (49)

A note on the identity of *Strigiphilus barbatus* (Osborn) and notes on two species of *Goniodes*. (22)

1956. A note on the identity of *Longimenopon pediculoides*. (7)

Mallophaga (chewing lice) occurring on the domestic chicken. (1)

1957. Notes on *Lagopoecus sinensis* (Sugimoto). (212)

1958. Catalogue of the types in the Snow Entomological Museum. Part II. (Mallophaga). (5)

1960. Two new species of *Craspedorrhynchus* (Mallophaga) from North America. (4)

Notes on the Osborn Mallophaga types. (8)

The identity of *Lipeurus volsellus* Ewing. (8)

A new species of *Chelopistes* (Mallophaga) from Texas and Mexico. (11)

Two new species of *Fulicoffula* from the sora. (43)

1961. Three new species of Mallophaga from the great horned owl. (8)

A new species of Mallophaga from the peafowl. (20)

Designation of a lectotype for *Amyrsidea magalosoma* (Overgaard, 1943). (13)

The Vernon L. Kellogg Mallophaga type material in the United States National Museum. (3)

1962. Mallophaga (chewing lice) occurring on the turkey. (61)

The families and genera of North American (north of Mexico) Mallophaga. (14)

List of Mallophaga found on North American (north of Mexico) mammals. (14)

Mallophaga found on domestic fowl. (5)

A new species of Mallophaga from New Guinea. (14)

1963. A new species of Mallophaga from Natal. (11)

1964. A new species of Mallophaga from the blackbilled cuckoo. (22)

A new species of Mallophaga from Malaya. (2)

1965. A new species of Mallophaga from the Philippines. (42)

The Vernon. L. Kellogg Mallophaga type material in the Cornell University Collection. (9)

1966. Mallophaga of the mammals of Panama. (2)

New species and records of *Rallicola* from New Guinea. (26)

March 1966: A new species of Mallophaga from the caracara. (2)

May 1966: A new species of Mallophaga from the caracara. (6)

1967. Carriker on Mallophaga. (47)

1968. The host of *Strachiella retusa martis* Werneck. (16)

1981. Status of five species of Mallophaga described by M. A. Carriker, Jr. (54)

Emerson & Elbel, 1957. A new genus of Ischnocera. (Mallophaga) (2)

New species and records of *Strigiphilus* from Thailand. (5)

1961. A new species of *Rallicola* from southeast Asia. (29)

Emerson & Johnson, 1961. The genus *Penenirmus* found on North American woodpeckers. (2)

Emerson & Price, 1966. A new species of *Parafelicola* from the small-spotted genet. (14)

1967. A new species of *Suricatoecus* from the Congo. (64)

A new species of *Fulicoffula* from Thailand. (33)

1968. A new species of *Parafelicola* from Mozambique. (8)

A new species of *Dennyus* from the Malaysian spine-tailed swift. (10)

A new species of *Rhynonirmus* from Thailand. (32)

1969. A new species of *Plegadiphilus* from the Cayenne ibis. (26)

New species and records of Mallophaga from Nigerian mammals. (7)

1971. Three new species of Mallophaga from African mammals. (7)

A new species of *Pelmatocerandra* from a diving petrel. (20)

1972. A new genus and species of Mallophaga from a New Guinea bush fowl. (24)

A new species of *Felicola* from the Liberian mongoose. (21)

1973. A new species of *Strigiphilus* from the saw-whet owl, *Aegolius acadicus*. (5)

A new species of *Damalinia* from the Formosan sitka deer. (5)

1975. Mallophaga from Venezuelan mammals. (9)

1976. Abrocomophagidae, a new family from Chile. (51)

1979. *Columbicola fortis*, *Cavifera abdita* and *Quateia irianensis* from the magnificent ground pigeon from New Guinea. (6)

Two new species of *Bovicola*. (38)

1980. A new species of *Rhynonirmus* from the noble snipe. (49)

A new species of *Suricatoecus* from the western cusimanse. (30)

1981. A new species of *Suricatoecus* from the fennec fox from Egypt with a key to the recognized species. (40)

1982. A new species of *Bovicola* from the Formosan serow, *Capricornis crispus swinhoei*. (44)

1983. A review of the *Felicola felis* complex found on New World cats. (35)

1984. A new species of *Goniodes* from the Mallee fowl. (11)

1985. The identity of *Quadriceps crasspedalis* and two new species of *Quadriceps*. (71)

1986. Two new species of *Quadriceps* from Australia. (55)

Two new species of Mallophaga from the Mallee fowl in Australia. (68)

1987. New records of chewing lice found on North American wild foxes north of Mexico. (44)

1988. New species of *Haematomizus* off the bush pig, *Potomochoerus porcus*, from Ethiopia, with comments on lice found on pigs. (30)

Emerson & Stojanovich, 1963. Two new species of Mallophaga from Asia. (33)

1964. A new species of Mallophaga from the Mikado pheasant. (163)

1965. A new species of Kelerimenopon from the Philippine Islands. (4)

Ewing, 1930. The taxonomy & host relationships of the biting lice of the genera *Dennyus* and *Eureum*... (20)

Hajela & Tandan, 1970. Species of *Ardeicola* (Mallophaga) parasitic on birds of the family Threskiornithidae. (2)

Kim & Emerson, 1971. Sucking lice from Iranian mammals. (1)

Kumar & Tandan, 1971. The species of *Ardeicola* (Phthiraptera: Ischnocera) parasitic on the Ciconiidae. (13)

Oniki & Emerson, 1982. A new species of *Brueelia* from the rufous motmot, *Baryphthengus ruficapillus*. (50)

Price, & Emerson, 1967. Two new species of *Colpocephalum* from neotropical Ciconiiformes. (14)

Additional synonymies within the amblyceran bird lice. (10)

1972. A new subgenus and three new species of *Geomydoecus* from *Thomomys*. (7)

1977. The genus *Meromenopon* from the Coraciiformes. (54)

1982. A new species of *Eomenopon* from Tasmania. (56)

1983. A new species of *Nosopon* from Africa. (58)

1984. A new species of *Megapodiella* from the Mallee fowl of Australia. (57)

1985. The identity of *Nirmus eos* from the rose-breasted cockatoo. (69)

1986. New species of *Cummingsia* from Peru and Venezuela. (66)

Two new species of *Hohorstiella* from New Guinea and New Britain. (65)

Two new species of Mallophaga from the black-tailed water hen of Australia. (61)

New Mallophaga from the black curassow in Venezuela. (70)

1987. A new species of *Rallicola*, subgenus *Parricola*, from the lotus bird in New Guinea. (61)

Scharf & Emerson, 1983. The subgenus *Desumenopon* of *Amyrsidea*. (55)

1984. A revision of *Amyrsidea*, subgenus *Cracimenopon*. (36)

Ward, 1955. Biting lice of the genus *Saemundssonina* (Mallophaga: Philopteridae) occurring on terns. (22)

ESA Presentations

The following presentations were given at the annual meeting of the Entomological Society of America at Indianapolis, IN, December 12-16, 1993.

Kern, W.H., Jr., P.G. Koehler & R.S. Patterson. Horizontal dispersal of cat flea larvae (*Ctenocephalides felis felis*).

Lawrence, W., G. Henderson & L.D. Foil. Susceptibility of cat flea pupae to the parasitic nematode *Steinernema carpocapsae*.

Dryden, M.W. & B. Breault. Evaluation of adulticides and an insect growth regulator to control flea populations in naturally infested homes.

Palma, K.G., W.R. Cambell & R.W. Meola. Efficacy of cat foam containing fenoxycarb and pyrethrum as an on-animal treatment.

R.W. Meola, S. Ready & S. Meola. Physiological effects of pyriproxyfen on adult cat fleas.

The following colleagues have sent reprints and citations since Flea News 47.

R. Eckerlin, T. Galloway, J.H. Greve, PAN X.-j., Pilgrim, R., Sapegina, V.F., Sleeman, P. & WANG D.-q.

New Taxa

In monitoring the literature these last few years it has become quite evident that systematic studies in the order Siphonaptera have diminished. Following is a list of new taxa that have come to my attention from 1992 to the present. Some of these have been mentioned in previous issues of Flea News, others have not. If you know of additional taxa that have been described during this period, please drop me a line with the citation. I will assign computer numbers to the 1992 taxa in the next issue of this newsletter.

1992

aethiopica Beaucournu & Morel. *Chiastopsylla*

caecus Beaucournu & Morel. *Ctenophthalmus*

iae Beaucournu & Kock. *Nycteridopsylla*

laxiprojectus LI K.-c. *Ctenophthalmus*

Status Report

As many of you know, my wife and I have been laboring over a volume dealing with the taxonomy, distribution and host preferences of the Siphonaptera of North America north of Mexico for some time. Some of this work has already appeared in the *Journal of Medical Entomology* but the remaining family treatments are far too extensive to publish in journal form. They include the Pulicidae, Ctenophthalmidae, Leptopsyllidae and Ceratophyllidae, all but the latter of which are in at least the first draft. Appendices dealing with host/parasite and parasite/host data, type localities, state lists and a section on biographies of those who have described taxa from North America are all complete in rough draft. The finished manuscript is expected to be approximately 1.5K pages, plus figures and distribution maps. REL
