Dr E. V. Isayeva - On the basis of information contained in a letter of August 1974 from a colleague in the U.S.S.R., the death was announced, in Flea News (3), of Dr E. V. Isayeva. It came therefore as a great and most pleasant surprise to receive a letter from Dr Isayeva recently, informing me that she is very much alive and well, and working as usual. - Sincere apologies are offered to Dr Isayeva for the incorrect statement and for any adversities that may have arisen from it. Please ensure that the name of our esteemed colleague will be reinstated where necessary.

Price increase of Volumes I-V of the Catalogue of the Rothschild Collection of Fleas, by Hopkins & Rothschild - the newly revised prices are now:
Vol.I: £6.25 Vol.II: £8.50 Vol.III: £10.50 Vol.IV: £22 Vol.V: £27.50
(Postage per volume: inland £0.75; overseas £1.00).

These volumes, and any other BM(NH) publications, are obtainable from booksellers, approved agents, or direct from: Publications (Sales), British Museum (Natural History), South Kensington, London SW7 5BD. Overseas agents: Continental Europe: Antiquariaat Junk, Walderstraat 10, P.O.Box 5, Lochem, Netherlands; Librairie Payot, 6 rue Grenus, 1211 Genève 11, Switzerland. North America: The British Book Centre Inc., 996 Lexington Avenue, New York, N.Y. 10021, U.S.A. Central America: Centro Anglo Mexicano del Libro, Villalongin 32, 1er Piso, Mexico 5, D.F., Mexico. South America: Carlos Hirsch, Florida 165, Buenos Aires, Argentina. Middle East: University Bookstore, University of Baghdad, P.O.Box 75, Baghdad, Iraq. Far East: MPH (Pte) Ltd, GPO Box B47, 71-77 Stamford Road, Singapore; Maruzen Co. Ltd, P.O.Box 605, Tokyo Central, Japan.

* * *

Printing errors - After having carefully corrected proofs it does happen occasionally that, rather infuriatingly, by some mishap the compositor introduces quite a new error which therefore finds its way unchecked into the publication. Two examples of this are found in Vol.V of the Flea Catalogue (1971) where: (a) on p.92, in the key to the subfamilies of Leptopsyllidae, in the first alternative of the sole couplet the last half of the second alternative was added ["and often absent, never of more than two spines"] which, please, delete in your copy of the book; (b) on p.236, figs. 268 and 269 are printed upside down (a correction slip is provided with the volume). - From this we learn that one should not be too ready to condemn an author for apparently sloppy proofreading.

* * *

It is hoped that the next number of Flea News will be accompanied by a copy of a code-numbered list of all named species and subspecies of fleas, as a first instalment of the Catalogue of Type Data, by F.G.A.M.Smit & A.M.Wright [referred to in Flea News (3)]. - As a relevant matter of interest a list of the numbers of these taxa described annually is given overleaf. If, for your own amusement, you turn these figures into a graph, you will see at a glance that growth continues at a fairly steady rate.
