FLEA NEWS is a biannual newsletter about fleas (Siphonaptera). It is mainly bibliographic in nature, but recipients are urged to check any citations given here before including them in publications. Many of our sources are abstracting journals and current literature sources such as National Agricultural Library (NAL) Agricola, and National Library of Medicine (NLM) Medline, and citations have not necessarily been checked for accuracy or consistent formatting.

Recipients are urged to contribute items of interest to the profession for inclusion herein, including: Flea research citations from journals that are not indexed in Agricola or Medline databases, Announcements and Requests for material, Contact information for a Directory of Siphonapterists (name, mailing address, email address, and areas of interest - Systematics, Ecology, Control, etc.), Abstracts of research planned or in progress, Book reviews, Biography, Hypotheses and Literature Reviews, and Anecdotes. Send to:

The 10<sup>th</sup> Biennial **International Symposium on Ectoparasites of Pets (ISEP)** was held in conjunction with the 7<sup>th</sup> annual meeting of the European Veterinary Parasitology College in Toulouse, France, June 4-5, 2009. Attendance at the two-day ISEP symposium was estimated at approximately 100 participants. There were 34 papers presented, of which 7 dealt with fleas in some capacity. The sessions also focused on other ectoparasites such as ticks, mites, biting flies and mosquitoes affecting dogs, cats, horses, donkeys, rabbits, and rodents. Biology, ecology, ectoparasitocides, disease, and regulatory issues were presented and discussed, representing a truly international perspective from industry, academia and government.

A gala dinner at the Hotel d'Assezat (Bemberg Foundation) was kindly supported by Bayer, Merial, and Novartis, providing a leisurely event to socialize and continue scientific dialog well into the evening.

Discussions were held to consider combining ISEP with the Livestock Insect Workers Conference (LIWC) and the American Association of Veterinary Parasitologists (AAVP) in the United States in 2011. Information will be forthcoming in future issues of Flea News. For further information, feel free to contact Dr. Bill Donahue.

### Flea-related presentations at the 2009 ISEP

*Efficacy of a Combination of a Fipronil-(S)-Methoprene Spot-On Formulation and Deltamethrin-Impregnated Collar in Controlling Fleas and Sandflies on Dogs.*

E. Bouhsira, M. Franc

*How to protect dogs from bites of vectors?*

H.Mehlhorn

*Ectoparasites of Dogs and Cats from Tirana, Albania.*

D. Xhaxhiu, I. Kusi, D. Rapti, M. Visser, M. Knaus, S. Rehbein.

*Detection of Bartonella spp. in cat fleas collected from Hungarian cats.*

R. Farkas, B. Tánczos, F. Beugnet, H-J. Boulouis.

*ESCCAP Ectoparasites guideline.*

Duncan J.

*Evaluation of speed and duration of efficacy of spinosad tablets for treatment and control of the fleas Ctenocephalides canis in dogs.*

M. Franc, E. Bouhsira

*Influence of temperature on the development of the African sub-species of flea of the cat Ctenocephalides felis strongylus (Jordan, 1925) (Pulicidae).*

P. Yao Kouassi; K.E. N'Goran
